13th International Conference on Cochlear Implants and Other Implantable Auditory Technologies

Munich, Germany
June 18–21, 2014

Congress Chair  Joachim Müller
Congress Secretary  John-Martin Hempel

Final Program

www.ci2014muc.com
Dear Colleagues,

A very warm welcome to Munich!

It is a real honour and great pleasure for us to host the 13th International Conference on Cochlear Implants and Other Implantable Auditory Technologies in Munich. The CI 2014 conference will continue the long tradition of the previous international meetings, and focus on a multitude of topics related to cochlear implants and implantable hearing devices. The theme for 2014 is ‘cochlear implants around the world’. We hope to give an overview of what is going on in our rapidly growing field.

Recently, our fascinating, interdisciplinary field received widespread public recognition when the Lasker-DeBakey Clinical Medical Research Award was given to Graeme Clark, Ingeborg Hochmair, and Blake Wilson for the development of the modern cochlear implant. We are fortunate that all three Lasker Award winners have agreed to contribute to our program with their keynote sessions. Enriching our scientific program further are keynote sessions on binaural hearing, middle ear mechanics related to hearing implants, and the upcoming vestibular implant. Round table discussions, invited lectures, and the ‘Bernstein Sparks Workshop on Modelling Cochlear Implants’ (organized by B. Seeber and W. Hemmert) complete our exciting line-up.

Managing the large number of submitted abstracts was a real challenge. We are immensely grateful to the scientific committee, who organized the systematic and anonymous abstract review process. Abstracts were ranked by two or three reviewers, which allowed us to differentiate between poster, talk, and ‘snapshot presentation’. The latter is a new format which allows a key message to be presented in a short oral talk, combined with an ePoster containing more detailed information.

Munich, the capital of Bavaria, is one of Germany’s most popular destinations and has much to offer: an inspiring mix of historic buildings, museums, arts, sights, churches, and more. Visitors from all over the world love the unique flair of the city. Enjoy the Bavarian hospitality and be inspired! The unique, relaxed, and creative atmosphere of the city provides the perfect backdrop for you to share and exchange knowledge in all fields related to cochlear implants and hearing implant technology.

With eager anticipation we await a meeting that not only addresses the latest developments in all fields of implantable technologies for the restoration of hearing, but also one that fosters interdisciplinary exchange and open discussion between specialists.

We are looking forward to seeing you here in Munich!

KEYNOTE SPEAKERS

**Professor Dr. Graeme Clark**

Graeme Clark led the research that resulted in the first clinically approved multiple-channel cochlear implant, providing speech understanding in profoundly deaf people. His basic research was also crucial in establishing this could be achieved safely, including a minimal risk of meningitis. It thus became the first sensory-neural prosthesis to effectively bring electronic technology into functional relationship with the central nervous system and human consciousness. His research also established that the multiple-channel implant provided effective speech perception and language in profoundly deaf children, and it was thus the first major advance in helping these children communicate in the last 250 years. For his research, Graeme Clark has received numerous national and international awards and honors, including the Prime Minister’s Prize for Science and Fellow of the Australian Academy of Science, Fellow of the Royal Society, London, an Honorary Fellow of The Royal Society of Medicine, and an Honorary Fellow of The Royal College of Surgeons. After retiring from the RTI, Prof. Wilson continued his positions as an Expert for a large project at five centers in Europe funded by the EC and aimed at the remediation of hearing loss.

**Professor Dr. Ingeborg Hochmair**

Ingeborg J. Hochmair-Desoyer holds a PhD in electrical engineering from the Technical University of Vienna, where she started her career in 1976 as a research assistant. Together with Erwin Hochmair, she developed the very first microelectronic multichannel cochlear implant, implanted in December 1977 in Vienna. After a research stay at the Institute for Electronics in Medicine, Stanford University, USA, and numerous publications and patents, Dr. Hochmair worked as a Consultant for the 3M company, St. Paul, USA, on neuroprostheses. From 1982 to 1989 she worked as a postdoctoral research scientist at the Institute of Applied Physics at the University of Innsbruck, Austria, and earned a venia legendi for medical technology at the faculty of Electrical Engineering, Technical University, Vienna, Austria. Since 1990, Dr. Hochmair built up the company MED-EL as CEO and CTO which she had founded together with Dr. Erwin Hochmair. Dr Ingeborg Hochmair is the author or co-author of more than 100 papers and the inventor or co-inventor of over 40 patents. She has been awarded a number of prizes for her scientific achievements, such as the Holzer Award (1979), the Leonardo da Vinci Award (1980) and the Sandoz Award (1984). In 1995, she won the Business Woman of the Year Award (Prix Veuve Clicquot) and, the following year, was awarded the Wilhelm Exner Medal. She was granted honorary doctorates by the faculty of medicine at the Munich University of Technology (2004) and by the Innsbruck University of Medicine (2010). She has been honored as a pioneer of the modern CI by receiving the Lasker-DeBakey Clinical Medical Research Award 2013 together with Graeme Clark and Blake Wilson.

**Professor Blake S. Wilson**

Prof. Wilson was initially trained as an electrical engineer but also became a hearing scientist in the ensuing years. He has a BSEE degree from Duke University and a DSc degree from the University of Warwick. He has led or co-led many multidisciplinary teams during the past three decades. He began his career at the Research Triangle Institute (RTI) in the Research Triangle Park (RTP), NC, USA. His positions there included Research Engineer (1974–78); Senior Research Engineer (1978–83); Head of the Neuroscience Program (1983–94); Director of the Center for Auditory Prosthesis Research (1994–2002); and Senior Fellow (2002–07). He with others created the Neuroscience Program and the Center for Auditory Prosthesis Research. After retiring from the RTI, Prof. Wilson continued his positions as an Adjunct Professor in the Department of Surgery at the Duke University Medical Center (DUMC) and as The Overseas Expert for a large project at five centers in Europe funded by the EC and aimed at the remediation of hearing loss. Prof. Wilson is the inventor of many of the speech processing strategies used with the present-day cochlear implants, including the continuous interleaved sampling (CIS), spectral peak picking (e.g., “n-ofm”), and virtual channel strategies, among others. One of his papers, in the journal Nature, is the most highly cited publication by far in the specific field of cochlear implants. Prof. Wilson – or he and his teams or colleagues – have received a high number of highly prestigious awards and honors, including for three examples among many the 2013 Lasker-DeBakey Clinical Medical Research Award, “for the development of the modern cochlear implant” (to Wilson, Graeme M. Clark, and Ingeborg J. Hochmair); the American Otological Society President’s Citation in 1997, for “Major contributions to the restoration of hearing in profoundly deaf persons” (to Wilson, Dewey T. Lawson, Charles C. Finley, and Mariangeli Zerbi); and the 1996 Discover Award for Technological Innovation in the category of “sound” (to Wilson). In addition, Prof. Wilson has been the Guest of Honor (GOH) at 13 international conferences and at three national conferences to date.
KEYNOTE SPEAKERS

**KEYNOTE SESSION 2, THURSDAY, JUNE 19**

10:30–12:30, VORTRAGSSAAL DER BIBLIOTHEK

**Middle Ear Implants**

**Dr.-Ing. Albrecht Eiber**

Academical Director at the Institute of Engineering and Computational Mechanics, University Stuttgart, Germany. Teaching and research: Modeling of dynamical systems (robots, vehicles, mechanisms and machines); Dynamics of Multibody systems; Mechatronical systems; Biomechanics. Since 1989 working in the field Mechanics of Hearing: Description of human middle and inner ear with mathematical models based on mechanical approaches using Multibody- and Finite Element systems techniques; determination of parameters from clinical measurements and from laboratory experiments; extensive use of Laser Doppler Vibrometry; investigations and numerical simulation of dynamical behavior of natural and diseased ears; transfer behavior of reconstructed ears using passive and active mechanical implants in the middle and in the inner ear; development of passive and actively driven implants. Supervising project- and diploma theses and doctoral dissertations. Chair of EUROMECH Colloquium “Biomechanics of Hearing”, Stuttgart 1997 and “4th International Symposium on Middle Ear Mechanics in Research and Otology” in Zurich 2006.

**KEYNOTE SESSION 3, FRIDAY, JUNE 20**

08:30–10:00, PHILHARMONIE

**Binaural Hearing**

**Professor Dr. Dr. Andrej Kral**

Andrej Kral was born in Bratislava, studied general medicine at the Comenius University (MD 1993). He joined the Institute of Pathological Physiology (1992–95), in collaboration with the Mathematical Institute (Prof. V. Majernik) worked on models of neuronal networks. In 1995, he moved to the Institute of Sensory Physiology, J. W. Goethe University, Frankfurt am Main (Head: Prof. R. Klinke) to focus on cochlear implants. He was appointed associate professor of physiology (“Priv.-Doz.”) at J. W. Goethe University in 2002. In 2004 he moved to Hamburg to become a professor of neurophysiology at the Institute of Neurophysiology, University of Hamburg. In 2009 he was appointed chair and professor of auditory neurophysiology at the Medical University Hanover. He is currently the director of research of the ENT clinics, the director of the Dept. of Experimental Otology and Institute of AudioNeuroTechnology. Since 2004 he has been adjunct professor of neuroscience and cognition at The University of Texas at Dallas, USA. His articles appeared in New Engl J Med, Science, Nature Neuroscience, Trends Neurosci, Brain, J Neurosci and Cereb Cortex.
KEYNOTE SPEAKERS

KEYNOTE SESSION 3, FRIDAY, JUNE 20
08:30–10:00, PHILHARMONIE

Binaural Hearing

Professor Dr.-Ing. Dr. Jens Blauert

Jens Blauert studied communication engineering at the RWTH Aachen University, where he received a Doctor-of-Engineering degree in 1969. In 1973, he delivered an inaugural dissertation to the Technical University of Berlin (habilitation), and in 1994 he was awarded an honorary degree (Dr. Tech.) by the University of Aalborg, Denmark. In 1974 he became chair professor at the Ruhr-University of Bochum, where he founded the Institute of Communication Acoustics, IKA, and headed it for 29 years. Subsequently, he was assigned emeritus professor. He has been visiting professor in various countries worldwide. Currently he is as distinguished visiting professor of Rensselaer Polytechnic Institute, Troy NY, – adjunct to its program on architectural acoustics. He was a professional acoustical consultant for more than 40 years, chartered in the state of North-Rhine Westphalia.

Prof. Blauert is the author/co-author of more than 170 papers and monographs, supervisor of 52 successful PhD projects and has been awarded several patents. He has received numerous reputable scientific medals and awards – recently the EAA award for lifetime achievements in acoustics. His major scientific fields of interest are spatial hearing, binaural technology, aural architecture, perceptual quality, speech technology, virtual environments, telepresence and quality of experience. Currently he is particularly interested in modelling active binaural listening.

He has provided services to the science community in positions such as chairman of the ITG committee on electroacoustics, dean of the Faculty of Electrical Engineering & Information Technologies and senator of the Ruhr-University of Bochum, cofounder and chairman of the board of the European Acoustics Association, EAA, president and vice president of the German Acoustical Society, DEGA, associate board member of the International Commission for Acoustics, ICA, member of the Environmental-Protection Council of the State of North-Rhine Westphalia, cofounder and board member of the European Speech-Communication Association, now ISCA, and cofounder and board member of the section on noise and vibration, NALS, of the German Standard Association, DIN.

Professor Blauert was elected fellow of the Acoustical Society of America, ASA, the Institute of Electrical & Electronic Engineering, IEEE, the Inst. of Acoustics, IoA, and the Audio Engineering Society, AES. He is an honorary member of the German society of audiology, DGA, and the Polish acoustical society, PAS.

Professor Dr. Benedikt Grothe

Benedikt Grothe has studied Biology and Psychology at the Ludwig-Maximilians-Universität München (LMU). He earned his doctor's degree in a study with focus on neurophysiology in 1991. After doing research at the University of Texas and New York University, he moved back to Germany to work as an assistant and later on as senior assistant at the LMU. In 1996 he qualified as professor in zoology. From 1999–2003 he worked as a senior researcher at the Max Planck Institute for Neurobiology in Martinsried. In 2003 he was appointed to the chair in neurobiology at the LMU. Since 2004 he is director of the neurobiology department and since 2006 spokesman of Munich Center for Neurosciences – Brain and Mind (MCN LMU). He was significantly involved in bringing the Bernstein Center for Computational Neuroscience to Munich. In 2006 he became coordinator of the newly established elite course “Master of Neuroscience” and “Graduate School of Systemic Neuroscience (GSN LMU)”. Since 2007 he belongs to the Bavarian Academy of Science.

Dr. Michael Jan Pecka

Dr. Pecka currently holds the position of a “Akademischer Rat a.Z.” at the LMU, section of Neurobiology (chaired by Prof. Grothe). His research concentrates on neuronal mechanisms of context-dependent processing of sensory information in the auditory system. Dr. Pecka received a Dr. rer. nat. degree from the LMU (2008), where he worked on mechanisms of synaptic inhibition for temporal processing in the auditory brainstem. During his post-doc with Prof. Mrsic-Flogel at the UCL in London (2009 to 2011), he transitioned to studying context-dependent coding of natural stimuli in the visual cortex, before returning to Munich as a “Wissenschaftlicher Assistent” to Prof. Grothe in 2011. Dr. Pecka has received a Feodor-Lynen Stipend of the Alexander-von-Humboldt Foundation for his post-doctorate work and is currently a member of the “Junge Kolleg” (Young Scholars Program) of the Bavarian Academy of Science.
KEYNOTE SPEAKERS

**Professor Dr. Charles C. Della Santina**

Charles C. Della Santina, PhD MD is a Professor of Otolaryngology – Head & Neck Surgery and Biomedical Engineering at the Johns Hopkins University School of Medicine, where he directs the Johns Hopkins Vestibular NeuroEngineering Lab. He received his PhD in BioEngineering from the University of California at Berkeley, where his work focused on development of silicon devices for interfacing to the auditory/vestibular nerve. Since completing his medical degree at the University of California at San Francisco and residency at Johns Hopkins, he has been a clinician-scientist at Johns Hopkins.

As a practicing surgeon, Dr. Della Santina specializes in treatment of inner ear disorders. His clinical interests include restoration of hearing via cochlear implantation and management of patients who suffer from vestibular disorders. His lab’s research centers on development of a multichannel vestibular implant intended to restore inner ear sensation of head movement. In addition to that work, his >80 publications include studies characterizing inner ear physiology and anatomy; developing novel clinical tests of vestibular function; and clarifying the effects of cochlear implantation, superior canal dehiscence syndrome, and intratympanic gentamicin therapy on the vestibular labyrinth. Dr. Della Santina is also the founder and CEO/Chief Scientific Officer of Labyrinth Devices LLC, a company dedicated to bringing novel vestibular implant technology into routine clinical care. His notable honors include the Robert Bárány Society Young Scientist of the Year Award, American Neurotology Society Frank M. Nizer Lectureship, ENTER Foundation Award for Innovation in Otolaryngology and ENT-UK Gordon Smyth Lectureship.

**Professor Dr. Robert Stokroos**

Robert Stokroos (1967) has been appointed as a full professor of otolaryngology – head and neck surgery at Maastricht University Medical Center (Maastricht, The Netherlands). His clinical focus is on otology and neurotology. He chairs multidisciplinary teams working on cochlea and auditory brainstem implants and on skull base surgery. His research efforts focus on the development and improvement of sensory substitution and repair devices. Fundamental research tries to elucidate central auditory mechanisms involved in tinnitus generation, and their reaction to the limited therapeutic options we have. Applied research led to the first vestibulocochlear implants, placed in 2012, substituting the organs of hearing and balance, and in 2013, to an implantable tinnitus suppressing device.

**Dr. Angelica Pérez Fornos**

Angélica Pérez Fornos was born in Mexico City, Mexico. She received the M.S. degree in biomedical engineering from the Universidad Iberoamericana, Mexico City, Mexico, and the PhD. degree in neuroscience from the University of Geneva, Geneva, Switzerland, in 1999 and 2006, respectively. The focus of her research is sensory perception evoked by electrical neuroprostheses (retinal implants, cochlear implants, and vestibular implants). Currently, she is the Scientific Director of the Cochlear Implant Center for French Speaking Switzerland (Centre Romand d’Implants Cochléaires, Geneva, Switzerland). Her main research project investigates the effects of electrical stimulation of vestibular nerve afferents in human subjects and the clinical significance of the rehabilitation that a vestibular implant could provide to patients suffering from a bilateral vestibular loss.
Cochlear implants are to date probably the most successful “spin off” from bridging clinical sciences and neuroscience research on the electrical stimulation of (auditory) neurons. Further advances are expected to come from a detailed understanding of the auditory system where computational models describing the neuronal and perceptual responses to electric stimulation will be used to develop novel algorithms. Due to the multi-disciplinarily of the field these advances will rely on neuroscientists, computational modelers, psychophysicists, engineers and clinicians working together. The Bernstein Sparks Workshop will bring together leading scientists involved in modeling and developing algorithms for auditory implants and we explicitly invite clinicians to join in to raise the mutual awareness of the issues involved in CIs and their implantation. The Bernstein Sparks Workshop on Modelling and Signal Processing for Auditory Implants is organized by Professor Seeber, the Bernstein Center for Computational Neuroscience Munich and the Bernstein Coordination Site.

Peripheral models and their use in developing coding strategies

Professor Dr. Ian C. Bruce

Dr. Ian C. Bruce received the B.E. (electrical and electronic) degree at The University of Melbourne, Melbourne, Australia, in 1991. From 1993–94, he was a research and teaching assistant in the department of bioelectricity and magnetism, Vienna University of Technology, Vienna, Austria. In 1998, he received the PhD degree from the Department of Otolaryngology, The University of Melbourne. Dr. Bruce was a postdoctoral research fellow in the department of biomedical engineering at Johns Hopkins University, Baltimore, MD, from 1998 to 2001. Since 2002, he has been in the department of electrical and computer engineering at McMaster University, Hamilton, ON, Canada, now at the rank of associate professor. Dr. Bruce is a member of the Acoustical Society of America and the Association for Research in Otolaryngology, is a registered professional engineer in Ontario, and is an associate editor of the Journal of the Acoustical Society of America.

Colin Horne, MA

Colin Horne received his degree in computing science from the University of Glasgow in 2009. After graduating, he designed and implemented spatial search algorithms at a start-up company in London. Since 2011, he has been investigating the phenomenological modelling of the electrically stimulated auditory nerve fibres during his PhD. at the MRC Institute of Hearing Research, Nottingham. His research interests include the phenomenological and biophysical modelling of the neuron.

Dipl.-Ing. Tamas Harczos

Tamas Harczos studied information technology at the University of Veszprém in Hungary from 1998 to 2004 and finished with a diploma (master’s degree) in computer science. During his thesis, Harczos developed a novel low bit-rate low-complexity speech compression algorithm. After his graduation he worked as Embedded Programmer for the automotive industry before joining the Pázmány Péter Catholic University in Budapest where he studied neurobiology, neurophysiology and cellular-neural-networks. In 2006, Harczos moved to Ilmenau, Germany, and joined the Bio-inspired Computing group (BIC) of the Fraunhofer Institute for Digital Media Technology, IDMT. His responsibilities at BIC include research, development and management in projects related to implantable auditory prostheses and models of the auditory system. He is also a PhD candidate at the Ilmenau University of Technology. His current research interests focus on the use of auditory models in cochlear implants (CI), and the algorithmic aspects of CI speech processors and that of sound source localization with bilateral CI systems.
Peripheral models and their use in developing coding strategies (continued)

**Professor Dr. Norbert Dillier**

Training as Electrical Engineer, PhD thesis on electrical stimulation of the auditory nerve at the Institute of Biomedical Engineering at the ETH and University of Zurich, Lecturer (1996) and Professor of Experimental Audiology (2002) at the University of Zurich, head of the Laboratory of Experimental Audiology at the ENT Department since 1978. Past president of the German Society of Audiology and former board member of the European Federation of Audiology Societies (EFAS). Main research interests: better understand and improve the function of auditory prostheses such as cochlear implants, auditory brainstem implants as well as conventional and implantable hearing aids. Enhance the speech discrimination performance, especially in noisy environments and improve the sound quality for music perception with these devices. Investigate new methods for programming and speech processor fitting especially for the very young children using objective electrophysiological measurement procedures.

**Professor Dr. Jan Wouters**

Jan Wouters, born 1960, obtained a Master and PhD in physics from the University of Leuven, KU Leuven, Belgium, in 1982 and 1989, respectively, with internship for officer military service. From 1989 till 1992 he was a Postdoc Research Fellow with the National Fund for Scientific Research (FWO) at the Institute of Nuclear Physics (UCL Louvain-la-Neuve) and at NASA Goddard Space Flight Center (USA). Since 1993 he is a Professor at the Dept. of Neurosciences of the KU Leuven (Full Professor since 2005) where he teaches 5 physics and audiology courses. His research focuses on audiology, the auditory system and auditory prostheses. He is author of about 240 articles in international peer-reviewed journals, associate editor of 3 international journals, president of the European Federation of Audiology Societies, and president of the Belgian Audiology Society B-Audio.

Binaural hearing with electric stimulation

**Professor H. Steven Colburn**

Steve Colburn studied Electrical Engineering at the Massachusetts Institute of Technology, where he received his bachelor’s, master’s, and doctor’s degrees in the 1960s and was on the faculty in the 1970s. He is now Professor of Biomedical Engineering at Boston University, where he has taught since 1980. He was the chair of that department through the 1980s. He is currently the Director of the Boston University Hearing Research Center, which promotes collaborative research and teaching across the units of the university. Dr. Colburn’s primary research involves the application of signal processing, statistical communication theory, and computational modelling to the study of hearing and hearing impairments. He is particularly interested in the measurement and modelling of binaural hearing performance. Specific current topics include modelling the activity of auditory brainstem neurons and measurement and modelling of spatial attributes of sound perception, speech intelligibility in complex sound environments and the effects of hearing impairments on binaural abilities.

**Ken Hancock, PhD**

Ken Hancock was born in Waterloo, Iowa in 1969. He received the B.S. (1991) and PhD (2001) degrees in biomedical engineering from Boston University. His doctoral work involved intracellular recording and labelling studies in dorsal cochlear nucleus and computational modelling of dorsal cochlear nucleus neural networks. He had a postdoctoral fellowship at the Eaton-Peabody Laboratories at the Massachusetts Eye & Ear Infirmary during which he studied interaural time difference coding in the inferior colliculus. He remains at the Eaton-Peabody Laboratories as a research associate, splitting his time between studying the neurophysiology of binaural hearing with cochlear implants and developing stimulus generation and data acquisition software.
Improving speech perception with cochlear implants with model-based approaches

Professor Dr. Waldo Vazquez Nogueira

Waldo Nogueira received the telecommunication engineering degree from the Technical University of Catalonia (UPC) and his PhD degree in electrical engineering from the Leibniz University of Hanover (LUH) in 2003 and 2007 respectively. During his PhD he developed several strategies for cochlear implants; some of them have been commercialized like the MP3000 by Cochlear Ltd. In 2008 he joined the European R&D center of Advanced Bionics and in 2009 he became principal research engineer with emphasis toward the PhD degree at Technical University of Munich, Germany. Currently he is working toward the PhD degree at Technical University of Munich, where he developed mathematical models to investigate the coding of sound in the auditory nerve for cochlear implants. His research interests include neural coding of sound, mathematical modelling, cochlear implants, neurophysiology and psychophysics.

Michele Nicoletti, MA

Michele Nicoletti was born in Nuremberg, Germany, in 1974. He received the B.E. (precision & micro engineering) degree at The Technical University of Applied Sciences, Munich, Germany, in 2005. In 2007, he received the Master (biomedical engineering) degree at The Technical University of Munich, Germany. From 2005–2006, he was a development engineer by the Max-Planck Institute of Biochemistry in the Nano Photonics-Group in Martinsried, Germany. 2007, he was a Research and Teaching Assistant in the Department of Micro Technology and Medical Device Technology, Technical University of Munich, Germany. From 2008–2014, he was a Research and Teaching Assistant in the Bio-Inspired Information Processing group, Technical University of Munich, Germany. Currently he is working toward the PhD degree at Technical University of Munich, where he developed mathematical models to investigate the coding of sound in the auditory nerve for cochlear implants. His research interests include neural coding of sound, mathematical modelling, cochlear implants, neurophysiology and psychophysics.

Professor Dr. rer. nat. Volker Hohmann

Volker Hohmann received the Physics degree (Dipl.-Phys.) and the doctorate degree in Physics (Dr. rer. nat.) from the University of Göttingen, Germany, in 1989 and 1993. He has been a faculty member of the Physics Institute, University of Oldenburg, Germany since 1993 and was appointed full professor in 2012. His research expertise is in acoustics and digital signal processing with applications to signal processing in speech processing devices, e.g., hearing aids. He is a consultant with the Hörzentrum Oldenburg GmbH. He was a Guest Researcher at Boston University, Boston, MA, (Prof. Dr. Colburn) in 2000 and at the Technical University of Catalonia, Barcelona, Spain in 2008. Prof. Hohmann received the Lothar-Cremer price of the German acoustical society (DEGA) in 2008 and the German President’s Award for Technology and Innovation in 2012.

We thank for funding from the German Federal Ministry of Education and Research and from the Munich Center for Neurosciences and for funding and organizational help from the Bernstein Center for Computational Neuroscience Munich and the Bernstein Coordination Site.
SESSION TYPES

■ Keynote Sessions
These sessions are conducted by distinguished speakers who have been invited to cover important topics or developments on a specific field.

■ Tutorials
Tutorials are intended to train young residents and other professionals in the field, especially those who are new in this area. The tutorials aim to convey basic knowledge to the audience and should allow interactive discussions.

■ Round Table Sessions
Round table sessions aim to create discussions on developing new fields. Sessions are organized and lead by two session moderators who guide and direct all important aspects of the topic. Only short snapshot presentations will be presented by the participants to give plenty of room for questions and answers and enough time for discussion among the audience.

■ Scientific Sessions
These sessions intend to cover a topic with all associated aspects. Scientific sessions are jointly organized by session chairpersons who take care of all aspects and also moderate the session. Speakers will either give invited presentations or present topics chosen from abstracts by the scientific committee. It is the duty of moderating chairs to ensure that all aspects of the topics are addressed and covered. The remaining time at the end of each session remains for questions and answers.

■ Bernstein Sparks Workshop “Modeling and Signal Processing for Auditory Implants”
The workshop will cover the topic from modeling the auditory periphery to models of auditory perception, and discuss their application for designing new stimulation strategies. We will bring together leading scientists involved in the modeling and developing algorithms for auditory implants and we explicitly invite clinicians to join this workshop to raise the mutual awareness of the issues involved in cochlear implants and their implantation.

■ Temporal Bone Workshop
Cochlear implant surgery and surgeons require a profound knowledge of anatomy. The aim of this temporal bone dissection sessions is to initiate mandatory training. This course is intended for otolaryngologists and residents in training with a defined experience in temporal bone anatomy and management of the ear to get an introduction to apply cochlear implants and other hearing implants. Each course can take five surgeons and lasts 90 min. Instructors guide the preparations of high quality temporal bones, dissecting all important anatomical landmarks and finally inserting CI electrodes or placing active middle ear implants. Experienced cochlear implant surgeons are present to assist and share their knowledge. Registration is possible on-site only. Slots are scheduled on a first come-first serve basis.

■ Invited Lectures
Invited lectures involve presentations of recognized researchers or clinicians and address the latest developments associated to either aspects of cochlear implants, diagnostics, surgery, rehabilitation or any other topics which are listed in the section topics of the conference. Invited lectures are included in scientific sessions as an introduction or a conclusion of the session.

■ Oral Presentations
This type of lecture involves submitted applications for oral presentation related to any topic of the conference. Oral talks aim to address the latest developments of a specific field associated with either aspects of cochlear implants, diagnostics, surgery, rehabilitation or any other topic listed in the section “topics of the conference”. Oral presentations are included in scientific sessions.

■ Snapshot Presentations
This is a new presentation format using advanced electronic posters and big screens which are based on PowerPoint files including videos or animations. The scientific paper includes both an electronic poster and a short condensed oral presentation of the key message (4 min). The ePoster part should be presented according to classic poster guidelines. Details should be included in the poster while the main learning message shall be presented during a 4 min oral presentation within the session. All snapshot presentations (posters part) are available throughout the poster terminals during the whole conference without the attendance of the speakers. Poster presentations will also be available for download on the website after the conference, if the authors agree. Snapshots are included in scientific sessions.

■ ePoster Presentations
Poster presentations will appear in a new presentation format which makes use of advanced electronic posters with big screens and an iPad controlled presentation and search system. The ePosters are based on PowerPoint files and may also include videos clips or animations.

■ Video Sessions
This is a new presentation format which also makes use of advanced electronic posters with big Full HD screens. The duration for a video presentation is 12 min and 3 min for discussion during the scheduled session. Video presentations are available throughout the presentation terminals during the whole conference without the attendance of speakers. Video presentations will also be available on the website after the conference, if the authors agree.

**Legend:**
- **T**: TUTORIAL
- **KN**: KEYNOTE LECTURE
- **S**: SCIENTIFIC SESSION
- **WS**: BERNSTEIN SPARKS WORKSHOP
- **P**: ePOSTER SESSION
- **VS**: VIDEO SESSION
- **RT**: ROUND TABLE
- **SAT**: SATELLITE SYMPOSIUM
- **OTHERS**
## T1 TUTORIAL

**Carl-Orff-Saal**

*07:30–08:30*

**Who gets what? Thoughts from an audiology perspective**

Supported by MED-EL

*Chair:* Jennifer Robinson (Innsbruck, Austria)

*Tutors:* Artur Lorens (Kajetany/Warsaw, Poland)
Andreas Büchner (Hanover, Germany)

**Discussion**

## T2 TUTORIAL

**Black Box**

*07:30–08:30*

**Medical documentation: ear and cochlea implant database – why the clinician needs a scientific database and the scientist needs a clinical database**

Supported by Innoforce

*Chair:* Thomas Linder (Lucerne, Switzerland)
Franz Schön (Wuerzburg, Germany)

07:30–07:35

**T2-1**

*Introduction*

Joachim Müller (Munich, Germany)

07:35–07:45

**T2-2**

*The MunichLMU Otologic Database – ENT statistics, © by innoForce Est*

Ulrich Kisser (Munich, Germany)

07:45–08:15

**T2-3**

*Ear and cochlea implant database – why the clinician needs a scientific database and the scientist needs a clinical database*

Thomas Linder (Lucerne, Switzerland)

08:15–08:30

**T2-4**

**Discussion**

## T3 TUTORIAL

**Chorprobensaal**

*07:30–08:30*

**Electrophysiology and cochlear implants**

*Chair:* Ranjith Rajeswaran (Chennai, India)
Viktor Reiman (Munich, Germany)

07:30–07:50

**T3-1**

*Electrophysiology for cochlear implants*

William Gibson (Gladesville, Australia)
Halit Sanlı (Gladesville, Australia)

07:50–08:10

**T3-2**

*Acoustic neural response telemetry: the equipment and methodology needed to measure residual hearing*

Halit Sanlı (Gladesville, Australia)

08:10–08:30

**T3-3**

**Discussion**
T4 TUTORIAL

07:30–08:30  Vortragssaal der Bibliothek

**Quality standards for cochlear implants and hearing implants**

*A contribution of the HEARRING Group*

**Chair:**
Christopher Raine (Bradford, United Kingdom)
Paul Van de Heyning (Antwerp, Belgium)

07:30–07:42  T4-1

**Quality standards for cochlear implants in adults and children**

Christopher Raine (Bradford, United Kingdom)

07:42–07:54  T4-2

**Quality standards for rehabilitation**

Jane Martin (Bradford, United Kingdom)
Helen Peebles (Bradford, United Kingdom)

07:54–08:30  T4-3

**Round table: Quality standards for all hearing implants**

Wolf-Dieter Baumgartner (Vienna, Austria)
Marco Caversaccio (Bern, Switzerland)
Han DeMin (Beijing, China)
Benoit Godey (Rennes, France)
Kevin Green (Manchester, United Kingdom)
Mohan Kameswaran (Chennai, India)
Joachim Müller (Munich, Germany)
Helen Peebles (Bradford, United Kingdom)
Gunesh Rajan (Fremantle, Australia)
Henryk Skarzynski (Warsaw, Poland)
Shin-Ichi Usami (Matsumoto, Japan)

KN1 KEYNOTE SESSION

08:30–10:00  Philharmonie

**The development of the modern cochlear implant:**

*Lasker-DeBakey clinical medical research award winner session*

**Chair:**
Alexander Berghaus (Munich, Germany)
Jan Helms (Tuebingen, Germany)
Joachim Müller (Munich, Germany)

08:30–08:35  KN1-1

**Introduction**

Joachim Müller (Munich, Germany)

08:35–09:00  KN1-2

**The multichannel cochlear implant for severe-to-profound hearing loss**

Graeme Clark (Melbourne, Australia)

09:00–09:25  KN1-3

**The modern cochlear implant: from invention and research to global use and current challenges**

Ingeborg Hochmair (Innsbruck, Austria)

09:25–09:50  KN1-4

**Toward better representations of sound with cochlear implants**

Blake Wilson (Durham, United States)

09:50–10:00  KN1-5

**Lasker award interviews 2013 video presentation**

10:00–10:30  Coffee break
### RT1  
**Philharmonie**  
#### 10:30–12:30  
**Cochlear implants: a remarkable past and a brilliant future – the “past presidents panel”**

**TB1 HANDS-ON WORKSHOP I**

**Temporal Bone Lab**

**Temporal bone**

**Instructor:** Stefan Dazert (Bochum, Germany)
Pavel Van de Heyning (Antwerp, Belgium)

**Tutors:** Ulrich Kissler (Munich, Germany)
Martin Patscheider (Munich, Germany)
Florian Schrötzlmair (Munich, Germany)

**P1-2 ePOSTER SESSION**

**ePoster 1**

**Radiology**

For details view p. 89

**RT2 ROUND TABLE**

**Kleiner Konzertsaal**

**Chinese-German friendship**

**Chair & Moderation:** Dong-Yi Han (Beijing, China)
Karl Hörmann (Mannheim, Germany)
Norbert Stasche (Kaiserslautern, Germany)

12:00–12:08 **RT2-1**

History of Chinese German friendship
Lisheng Yu (Beijing, China)

12:08–12:12 **RT2-2**

Deaf patients are sensitive to ‘hear sound photo’: evidence from event related potentials
Maojin Liang (Guangzhou, China)

12:12–12:16 **RT2-3**

Establishment and rudimentary application of the method of recording EMLR in cochlear implantation
Bin Wang (Beijing, China)

12:16–12:20 **RT2-4**

Pre-processing with microphone array and noise reduction for electroacoustic stimulation of cochlear implant simulation on Chinese speech recognition in noise
Chao-Min Wu (Chung-Li, Taiwan)

12:20–12:24 **RT2-5**

The effect of cultural differences on timbre perception
Liu Ziye (Beijing, China)

12:24–12:28 **RT2-6**

A case report of the cochlear implant electrode array misplacement into vestibular and superior semicircular canal
Zhaomin Fan (Ji Nan, China)

12:30–13:30 **Lunch break**
### RT3
#### Round Table

**Philharmonie**

**Honorary Chair:**
- Agnes Hildmann (Bochum, Germany)

**Chair & Moderation:**
- Joachim Müller (Munich, Germany)
- Blake Papsin (Toronto, Canada)

**Panelists:**
- Wolf-Dieter Baumgartner (Vienna, Austria)
- Catherine Birman (Sydney, Australia)
- Robert Briggs (Melbourne, Australia)
- Mohan Kameswaran (Chennai, India)
- Eva Karltorp (Stockholm, Sweden)
- Roland Laszig (Freiburg, Germany)
- Thomas Lenarz (Hanover, Germany)
- Robert Mlynski (Wuerzburg, Germany)
- Angel Ramos (Las Palmas, Spain)
- Nancy Young (Chicago, United States)

### S5
#### Scientific Session

**Carl-Orff-Saal**

**Chair:**
- Bruce Gantz (Iowa City, United States)
- Wolfgang Gstöttner (Vienna, Austria)

**13:30–15:00**

**S5-1**
- *The influence of different types of acoustic amplification on hearing performance in subjects with electric-acoustic stimulation*
- Thomas Lenarz (Hanover, Germany)

**S5-2**
- *The effects of speech maskers in electric acoustic stimulation*
- Christoph Arnoldner (Vienna, Austria)

**S5-3**
- *Influence of insertion angle on speech perception after cochlea implantation*
- Silke Helbig (Frankfurt, Germany)

**S5-4**
- *Apical electrical stimulation after deep electrode insertion in patients with partial deafness*
- Artur Lorens (Kajetany/Warsaw, Poland)

**S5-5**
- *Tolerable processing delay in electro-acoustic stimulation*
- Josef Chalupper (Hanover, Germany)

**S5-6**
- *The role of map parameters on hearing preservation and speech perception outcomes with EAS*
- Margaret Dillon (Chapel Hill, United States)

**S5-7**
- *EAS and residual hearing with positive genetic background*
- Kozo Kumakawa (Tokyo, Japan)

**S5-8**
- *Clinical evaluation of the Nucleus® CP900 series processor in Hybrid mode: comparison of speech perception scores with and without the acoustic component in the Midlands hearing implant program – children’s service, UK*
- Justine Maggs (Birmingham, United Kingdom)

**S5-9**
- *Long term outcomes in cochlear implant adult subjects with pre-implant low-frequency residual hearing*
- Roberto Filipo (Rome, Italy)

**S5-10**
- *Localization and speech intelligibility in bilateral and EAS cochlear implant users*
- Louise Loiselle (Tempe, United States)

**S5-11**
- *Nucleus 6 Hybrid Sound processor in patients with residual hearing*
- Anna Romy Götzte (Potsdam, Germany)

**S5-12**
- *Relationship between speech discrimination and spread of excitation profile width in simulated CI speech processor – comparison of electric only and PDT EC hearing*
- Adam Walkowiak (Kajetany/Warsaw, Poland)
THURSDAY | JUNE 19, 2014

DETAILED PROGRAM

14:30–14:38 S5-14 Influence of CI electrodes on acoustic waves in the cochlea
Frank Böhnke (Munich, Germany)

14:38–14:42 S5-15 The impact of a cochlear implant electrode array on middle ear transfer function – a temporal bone study
David Pazen (Cologne, Germany)

14:42–14:46 S5-16 Vibro-EAS: a proposal for advanced electroacoustic stimulation
Sebastian Schraven (Wuerzburg, Germany)

14:46–14:50 S5-17 Inferences and metaphoric comprehension in unilaterally implanted children with adequate formal oral language performance
Maria Nicastri (Rome, Italy)

13:30–15:00 S6 SCIENTIFIC SESSION Black Box

13:30–13:38 S6-1 Recognition of musical emotions in patients with cochlear implant
Emmanuèle Ambert-Dahan (Paris, France)

13:38–13:46 S6-2 Auditory and gestural influences on song learning in children with cochlear implants
Tara Vongpaisal (Edmonton, Canada)

13:46–13:54 S6-3 The “magic” of music made real in daily routine: a new habilitative tool for infant and toddler with hearing loss
Maria Nicastri (Rome, Italy)

13:54–13:58 S6-4 Childhood assessment of music perception skills (CHAMPS) in children with cochlear implants: a new test and pilot data
Christopher Linstrom (New York, United States)

13:58–14:02 S6-5 Music engagement: the potential of the singing voice – an initial investigation of a group therapy approach
Johanna Pätzold (Durham, United States)

14:02–14:06 S6-6 A comparison of music style identification abilities between cochlear implant and hearing aid users: setting realistic expectations for cochlear implant recipients
Valerie Looi (Sydney, Australia)

14:06–14:10 S6-7 The impact of cochlear implantation of music appreciation
Valerie Looi (Sydney, Australia)

14:10–14:14 S6-8 Music perception and appreciation in young adults with cochlear implants
Bess Nagler (New York, United States)

14:14–14:18 S6-9 Research of apical effect on music perception – preliminary study
Meijui Huang (Taipei, Taiwan)

14:18–14:22 S6-10 Fine structure contributions to discrimination of musical stimuli
David Friedland (Milwaukee, United States)

14:22–14:26 S6-11 Association of music recognition and speech perception in children with bilateral cochlear implants: effects of music training, implanted side and binaural hearing
Yukihiko Kanda (Nagasaki, Japan)

14:26–14:34 S6-12 The effect of music therapy and training on speech and music perception in cochlear-implant users
Rolien Free (Groningen, The Netherlands)

14:34–14:38 S6-13 Electrophysiological evidence for semantic processing of music by cochlear implant-recipients
Anja Hahne (Dresden, Germany)

14:38–14:42 S6-14 Improving learning ability by music & different aspects of music on CI users
Susan Abdi (Tehran, Iran)
### Detailed Program

New trends in electrode development & new technologies

Chair: Jan Peter Thomas (Bochum, Germany)
Neelam Vaid (Pune, India)

13:30–13:38  S8-1  Investigation of inner ear trauma using three dimensional force measurement system
Ersin Avci (Hanover, Germany)

13:38–13:42  S8-2  New approaches to improve performance of cochlear implant electrode arrays
Robert Cowan (Melbourne, Australia)

13:42–13:46  S8-3  Concept and development of a new shape memory cochlear implant electrode
Omid Majdani (Hanover, Germany)

13:46–13:54  S8-4  Hydrogel-based self-bending mechanism for cochlear implants
Jan Stieghorst (Hanover, Germany)

13:54–13:58  S8-5  Mondini dysplasia: a new electrode designed for cochlear implantation
Javier Cervera (Madrid, Spain)

13:58–14:02  S8-6  Electrodes loaded with corticoids for cochlear implantation: impact on residual hearing
Dorothee Douchement (Lille, France)

14:02–14:10  S8-7  Carbon nanotube-based interfacing of neural structures
Katharina Tegtmeier (Hanover, Germany)

14:10–14:18  S8-8  NANOCI – first steps towards a gapless auditory nerve – cochlear implant interface
Pascal Senn (Bern, Switzerland)

14:18–14:22  S8-9  Concept of implanted probes for continuous ESRT measurements
Hans Wilhelm Pau (Rostock, Germany)

14:22–14:26  S8-10  Using an electro anatomical model of the human cochlea as a current spread predictor and implant positioning diagnostic tool
Joseph Giorgio (Sydney, Australia)

14:26–14:30  S8-11  A longitudinal study of frequency specific electrical stimulation levels in cochlear implant users
Gijung Im (Seoul, Korea)

14:30–14:38  S8-12  Predicting speech understanding and psychophysical tuning curves from focused thresholds and medial-lateral electrode distance
Zachary Smith (Centennial, United States)

14:38–14:42  S8-13  Further results with the HiFocus Mid-Scala electrode
Antje Aschendorff (Freiburg, Germany)

14:42–14:46  S8-14  Simultaneous bilateral implantation of freedom and 422 in children: is there equipoise between the devices?
Sharon Cushing (Toronto, Canada)

## S12 SCIENTIFIC SESSION | Black Box

### 15:00–15:45

**Drug delivery**

**Chair:** Stephen O’Leary (Melbourne, Australia)  
Thomas Stark (Munich, Germany)

**15:00–15:08**  
S12-1 Studies on the efficacy of dexamethasone-eluting electrodes and evaluation of potential risks  
Thomas Stark (Munich, Germany)

**15:08–15:16**  
S12-2 Mechanisms involved in loss of residual hearing post implantation and therapeutic implications  
Adrien Eshraghi (Miami, United States)

**15:16–15:20**  
S12-3 Evaluation of the systemic and intratympanic application of the selective glucocorticoid receptor agonist compound-A for ototoxic effects in a guinea-pig model  
Clemens Honecker (Vienna, Austria)

**15:20–15:24**  
S12-4 Long-term protective effects of neurotrophic treatment of the auditory nerve in deafened guinea pigs  
Sjaak Kils (Utrecht, The Netherlands)

**15:24–15:28**  
S12-5 Adipose tissue-derived stem cell (ASC) application enhances the survival of spiral ganglion neurons in vivo  
Andreas Radeloff (Wuerzburg, Germany)

**15:28–15:32**  
S12-6 On the way to the inner ear: nanoparticle-loaded thermosensitive drug delivery systems for treatment of inner ear diseases and traumata after cochlear implantation  
Elisabeth Engleder (Vienna, Austria)

**15:32–15:36**  
S12-7 Passive delivery of dexamethasone to the inner ear from a cochlear implant  
Christopher Miller (Sydney, Australia)

**15:36–15:40**  
S12-8 The NeuEar project: developing a neurotrophic cochlear implant for severe hearing loss  
Jens Tornoe (Ballerup, Denmark)

**15:40–15:44**  
S12-9 Role of antioxidants in saving inner ear anatomy and function  
Abdulaziz Jifrey (Jeddah, Saudi Arabia)

## S13 SCIENTIFIC SESSION | Chorprobensaal

### 15:00–16:30

**Development of implanted children incl. cognitive and social development & educational aspects**

**Chair:** Annerose Keilmann (Mainz, Germany)  
Ona Bo Wie (Oslo, Norway)

**15:00–15:08**  
S13-1 Progressive hearing loss in children – diagnosis, referral & outcomes of cochlear implantation  
David Strachan (Bradford, United Kingdom)

**15:08–15:12**  
S13-2 The primary triangle: mother, father and infant. What happens when the child is prelingually deaf using a cochlear implant?  
Ersilia Bosco (Rome, Italy)

**15:12–15:16**  
S13-3 The effect of bilateral/bimodal cochlear implant use on speech perception, language and verbal cognition skills in children  
Leo De Raeve (Zonhoven, Belgium)

**15:16–15:20**  
S13-4 Cognition, perception and language development after three years of implantation for children  
Aurore Berland (Toulouse, France)

**15:20–15:28**  
S13-5 Progress of auditory and speech rehabilitation of CI children as compared to normally hearing group  
Katarzyna Bierkowska (Krosno, Poland)

**15:28–15:32**  
S13-6 Monitoring language, musical, motor and social-emotional skills using the musical journey resource  
Claire Tollenaere (Ghent, Belgium)

#### Round Table

**RT4**

**Kleiner Konzertsaal**

**15:00–16:30**

**Cholesteatoma, chronic otitis and CI**

Chair & Moderation: Per Caye-Thomasen (Copenhagen, Denmark)

Panelists: Caglar Batman (Istanbul, Turkey)

Robert Briggs (Melbourne, Australia)

Bruce Gantz (Iowa City, United States)

Yongxin Li (Beijing, China)

Levent Olgun (Izmir, Turkey)

Heidi Olze (Berlin, Germany)

Christopher Raine (Bradford, United Kingdom)

Thomas Stark (Munich, Germany)

Haruo Takahashi (Nagasaki, Japan)

Andrej Zarowski (Wilrijk, Belgium)

**ePoster Session**

**P1-4**

**ePoster 1**

**15:00–16:30**

**Hearing & structure preservation II**

For details view p. 93

**Hands-On Workshop III**

**TB3**

**Temporal Bone Lab**

**15:00–16:30**

**Temporal bone**

Instructors: Wolf Dieter Baumgartner (Vienna, Austria)

Wolfgang Elsässer (Feldkirch, Austria)

Joachim Müller (Munich, Germany)

Tutors: Ulrich Kissler (Munich, Germany)

Martin Patscheider (Munich, Germany)
### S16 SCIENTIFIC SESSION

#### Black Box

**15:45–16:30**

**Title:** Hearing implants in the military

**Chair:** Roland Jacob (Koblenz, Germany)
Mark Packer (Lackland, United States)

**15:45–15:49**

S16-1 Single-sided deafness: an initial examination of cochlear implants in the military
Joshua Bernstein (Bethesda, United States)

**15:49–15:53**

S16-2 Hearing with cochlea implant in military flight personal (case report)
Roland Jacob (Koblenz, Germany)

**15:53–16:01**

S16-3 Middle ear implants helping soldiers return to duty
Mark Packer (Lackland, United States)

**16:01–16:05**

S16-3 Electromagnetic compatibility of cochlear implant with C-97 aircraft
Juliana Caldeira (São Paulo, Brazil)

**16:05–16:09**

S16-4 Functional magnetic resonance imaging evidence of middle-ear kinesthesia involvement in tinnitus: implication for implantable device
Agnès Job (Bretigny sur Orge, France)

**16:09–16:13**

S16-5 Vocational rehabilitation of soldiers: what we can learn for civilian life
Yvonne Stelzig (Koblenz, Germany)

### S15 SCIENTIFIC SESSION

#### Carl-Orff-Saal

**16:00–16:30**

**Title:** Hearing and structure preservation

**Chair:** Silke Helbig (Frankfurt, Germany)
Gunesh Rajan (Fremantle, Australia)

**16:00–16:10**

S15-1 Hearing preservation classification
Artur Lorens (Kajetany/Warsaw, Poland)

**16:10–16:14**

S15-2 Key factors to preserve residual hearing in round window approach for cochlear implantations
Yun-Hoon Choung (Suwon, Korea)

**16:14–16:22**

S15-3 Long-term hearing preservation in electric-acoustic stimulation patients, up to 10 years
Griet Mertens (Edegem, Belgium)

**16:22–16:26**

S15-4 Hybrid vs. traditional cochlear implant voices, melody and instrument recognition in noise
Italo Cantore (Potenza, Italy)

**16:30–17:00**

Coffee break

Supported by Spiggle & Theis Medizintechnik  
Chair: Stefan Dazert (Bochum, Germany)  
Livio Presutti (Modena, Italy)  
07:30–07:45 | T8-1 Anatomy of the round window  
Daniele Marchioni (Modena, Italy)  
07:45–08:00 | T8-2 Endoscopic otosurgery  
Livio Presutti (Modena, Italy)  
08:00–08:10 | T8-3 Endoscopic CI – a call for caution  
Muazz Tarabichi (Dubai, United Arab Emirates)  
08:10–08:30 | T8-4 Discussion |
### KEYNOTE SESSION

**Philharmonie**

**08:30–10:00**

**Binaural hearing**

*Chair:* Daniel Visser (Munich, Germany)  
Blake Wilson (Durham, United States)

**08:30–08:35**  
**KN3-1** Introduction

**08:35–09:00**  
**KN3-2** Congenital single-sided deafness affects aural preference and binaural processing  
*Andréj Kral* (Hanover, Germany)

**09:00–09:20**  
**KN3-3** Binaural processing and spatial hearing: it’s all relative  
*Benedikt Grothe* (Planegg-Martinsried, Germany)  
*M. Pecka* (Munich, Germany)

**09:20–09:50**  
**KN3-4** Listening in acoustically adverse conditions: models and algorithms  
*Jens Blauert* (Bochum, Germany)  
*Rainer Martin* (Bochum, Germany)

**09:50–10:00**  
**KN3-5** Burian-Helms Award ceremony

### ROUND TABLE

**Philharmonie**

**10:30–12:30**

**New indications (structured round table)**

*Chair & Moderation:* Roland Laszig (Freiburg, Germany)  
*Henryk Skarzynski* (Warsaw, Poland)

**10:30–10:45**  
**RT7-1** From concept to therapy  
*Paul Van de Heyning* (Antwerp, Belgium)

**10:45–11:00**  
**RT7-2** Cochlear implantation as hearing rehabilitation method in single-sided deafness after acoustic neuroma surgery with intracochlear placeholder insertion  
*Roland Laszig* (Freiburg, Germany)

**11:00–11:15**  
**RT7-3** Partial deafness CI in children  
*Henryk Skarzynski* (Warsaw, Poland)

**11:15–11:23**  
**RT7-4** Nucleus® cochlear implants for patients with severe tinnitus and asymmetric hearing loss  
*Ángel Ramos Macias* (Las Palmas, Spain)

**11:23–11:35**  
**RT7-5** Conception and long term results of hearing rehabilitation by cochlear implantation in single sided deafness after trans labyrinthine approach to the skull-base  
*Thomas Klenzner* (Duesseldorf, Germany)

**11:35–11:43**  
**RT7-6** Hearing preservation, hybrid stimulation, and speech understanding in an expanded indication study; preliminary results  
*Craig Buchman* (Chapel Hill, United States)

**11:35–11:39**  
**RT7-7** Ipsilateral simultaneous cochlear implantation in vestibular schwannoma resection with normal contralateral hearing  
*Marinar Medina* (Piacenza, Italy)

**11:39–11:47**  
**RT7-8** Ipsilateral cochlear implantation in patients with NF 2 and sporadic vestibular schwannoma in the only hearing ear  
*Antonio Caruso* (Piacenza, Italy)

**11:43–11:47**  
**RT7-9** Hearing preservation and hearing rehabilitation in acoustic neuroma  
*E. Zanoletti* (Padova, Italy)

**11:47–11:51**  
**RT7-10** Cochlear implantation and simultaneous labyrinthectomy in Mennier’s disease  
*Giuseppe Frau* (Rovereto, Italy)

**11:51–11:55**  
**RT7-11** Outcomes following cochlear implantation for patients with single sided deafness, including those with recalcitrant Ménière’s disease  
*Bruce Gantz* (Iowa City, United States)

**11:55–11:59**  
**RT7-12** Is “no response” on diagnostic auditory brainstem response testing an indication for cochlear implantation in children?  
*Craig Buchman* (Chapel Hill, United States)

12:30–13:30 Lunch break

13:30–15:00 ROUND TABLE

RT8 Bilateral cochlear implants

Chair & Moderation: William Gibson (Gladesville, Australia)
Mattheus Vischer (Bern, Switzerland)

Panel Discussion

Panelists: Marcus Atlas (Perth, Australia)
Jean-Pierre Bébear (Bordeaux, France)
Robert Briggs (East Melbourne, Australia)
Abdulrahman Hagr (Riyadh, Saudi Arabia)
Eva Karltorp (Stockholm, Sweden)
Roland Laszig (Freiburg, Germany)
Blake Papsin (Toronto, Canada)
Christopher Raine (Bradford, United Kingdom)
Angel Ramos (Las Palmas, Spain)
Daniel Visser (Munich, Germany)
Andrej Zarowski (Wilrijk, Belgium)

Including:

RT8-2 The virtual reality as a tool for the investigation of the mobile and stationary localization with monaurally and binaurally hearing CI users
Daniel Visser (Munich, Germany)

RT8-3 The effect of sequential or simultaneous bilateral cochlear implantation on speech reception thresholds and spatial listening abilities in children born with profound hearing impairment
Christopher Raine (Bradford, United Kingdom)

RT8-4 Bilateral implantation in children: hearing in noise and localization benefits
Jean-Pierre Bébear (Bordeaux, France)

RT8-5 Comparison between binaural and bilateral recipients for speech intelligibility and sound localization abilities
Jean-Pierre Bébear (Bordeaux, France)

RT8-6 Effect of bilateral cochlear implants to treat vestibular symptoms
Blake Papsin (Toronto, Canada)

RT8-7 Bilateral cochlear implants – sequential versus simultaneous CI
Marcus Atlas (Perth, Australia)
### Active middle ear implants

**Chair:** Hannes Maier (Hanover, Germany)
Sébastien Schmerber (Grenoble, France)

S34 SCIENTIFIC SESSION ➤ Chorprobensaal

17:00–18:45
Snapshot presentations on health economics and panel discussion
Chair: Wolf-Dieter Baumgartner (Vienna, Austria)
      Brian John McKinnon (Memphis, United States)

17:00–17:04 S34-1 Cochlear implantation in South Africa: the triumph and the tragedy
      Iain Butler (Bloemfontein, South Africa)

17:04–17:08 S34-2 The direct costs of cochlear implantation in South Africa
      Magteld Smith (Bloemfontein, South Africa)

17:08–17:12 S34-3 Cost-utility analysis of bilateral cochlear implantation in adults:
      choosing the most appropriate health utility instrument
      Joseph Chen (Toronto, Canada)

17:12–17:16 S34-4 Obamacare in the US: what does it mean for cochlear implant access?
      Donna Sorkin (McLean, United States)

17:16–17:20 S34-5 Factors affecting cochlear implant access in the United States
      Donna Sorkin (McLean, United States)

17:20–17:24 S34-6 Economic evaluation of cochlear implantation in children using Australian costs
      and consequences
      Chris Foteff (Sydney, Australia)

17:24–17:28 S34-7 Adults with cochlear implantation demonstrate significant rise in average annual
      personal income
      Vincent Lin (Toronto, Canada)

17:28–17:32 S34-8 Establishment of a government funded cochlear implant program in Kerala –
      guidelines for efficient functioning
      Manoj Puthiyaparambil (Calicut, India)

17:32–17:36 S34-9 Improving cost-effectiveness of pediatric cochlear implantation before one year
      Susan Abdi (Tehran, Iran)

17:36–17:44 S34-10 Evaluation of cost-utility in middle ear implantation in the "Nordic School" a multicenter
      study in Sweden and Norway
      Nadine Schart-Morén (Uppsala, Sweden)

17:44–17:48 S34-11 10 years of cochlear implantation in India: trends and outcomes
      Shalabh Sharma (New Delhi, India)

17:48–17:52 S34-12 The DoD Hearing Center of Excellence – creating a hearing health improvement network
      Mark Packer (Lackland, United States)

17:52–17:56 S34-13 Transferability of lean tools and methodologies to CI programs functioning in non-lean
      medical centers
      Douglas Backous (Seattle, United States)

Panel Discussion
Panelists:
Douglas Backous (Seattle, United States)
Wolf-Dieter Baumgartner (Vienna, Austria)
Lennart Edfeldt (Uppsala, Sweden)
Bernard Gil Fraysse (Toulouse, France)
Brian John McKinnon (Memphis, United States)
Gerry O’Donoghue (Nottingham, United Kingdom)

PROGRAM OVERVIEW

T: TUTORIAL
KN: KEYNOTE LECTURE
S: SCIENTIFIC SESSION
VS: VIDEO SESSION
WS: BERNSTEIN SPARKS WORKSHOP
P: ePOSTER SESSION
SAT: SATELLITE SYMPOSIUM
RT: ROUND TABLE
OTHERS

Vortragssaal der Bibliothek
07:30–08:30
ARRISCOPE – advantages of digital surgical microscopy
► see page 72

Kleiner Konzertsaal
07:30–08:30
Video session (without authors, poster area 2nd floor)
► see page 88

P1-11
08:30–09:30
Auditory neuropathy
► see page 110

P1-12
09:30–10:00
ABI – Auditory Brainstem Implants
► see page 111

S39
09:30–10:30
Music and CI II
► see page 77

RT12
09:30–10:30
Deep insertion vs. shallow insertion
► see page 78

P2-10
08:30–10:30
Sound coding
► see page 110

Hands-on Workshop IX
08:30–10:00
Temporal bone
► see page 76

Coffee break

S42
11:00–12:00
Outcomes in children incl. multihandicapped children
► see page 80

S43
11:00–12:00
Genetics & gene therapy
► see page 81

P2-10
11:00–12:00
Bone conduction devices
► see page 112

P2-11
11:00–12:00
Complications
► see page 114

Hands-on Workshop X
11:00–12:30
Temporal bone
► see page 76

Hands-on Workshop X
11:00–12:30
Temporal bone
► see page 76

Coffee break

S47
12:00–13:00
Outcomes in adults
► see page 83

RT15
12:00–13:00
Tinnitus and non-auditory side effects
► see page 84

P2-12
12:00–13:00
Quality of life and economics
► see page 116

13:00–13:15
Announcement and farewell
► see page 84

Lunch break

Others
14:00–16:00
Cochlear implants & hearing implants compact, structured session & round table in German language
► see page 85

14:00

15:00

16:00

17:00

18:00
### T9 TUTORIAL

**Carl-Orff-Saal**

**07:30–08:30**

**Choosing the right electrode for a patient: cochlear duct length and malformation**

*Supported by MED-EL*

**Chair:** Marco Caversaccio (Bern, Switzerland)

- **07:30–07:45** T9-1 Audiological results with increasing cochlear coverage
  *Thomas Lenarz (Hanover, Germany)*

- **07:45–08:00** T9-2 Malformation and the appropriate electrode
  *Levent Sennaroglu (Ankara, Turkey)*

- **08:00–08:15** T9-3 Deriving cochlear duct length and using software to choose the right electrode
  *George Alexiades (New York, United States)*

- **08:15–08:30** T9-4 Evaluating cochlear length with radiological tracing from base to apex
  *Waldemar Würfel (Hanover, Germany)*

### T10 TUTORIAL

**Black Box**

**07:30–08:30**

**Binaural hearing**

**Chair:** Uwe Baumann (Frankfurt, Germany)

**Speaker:** Stefan Zirn (Munich, Germany)
  *Daniel Polterauer (Munich, Germany)*
  *Daniel Visser (Munich, Germany)*

### T11 TUTORIAL

**Chorprobensaal**

**07:30–08:30**

**Basic principles of flap design of the head region**

**Chair:** John Martin Hempel (Munich, Germany)

**Speaker:** Christian Betz (Munich, Germany)
  *Gerd Rasp (Innsbruck, Austria)*
  *Mario Zernotti (Cordoba, Argentina)*

- Skin flap complications after cochlear implantation
- Wojciech Gawęcki (Poznani, Poland)

### T12 TUTORIAL

**Vortragssaal der Bibliothek**

**07:30–08:30**

**ARRISCOPE – advantages of digital surgical microscopy**

*Supported by ARRI MEDICAL*

**Chair:** Jan Helms (Tuebingen, Germany)

**Speaker:** Hans Kiening (Munich, Germany)

### VS2 VIDEO SESSION

**Poster area 2nd floor**

**07:30–08:30**

**Video session without authors**

For details view p. 88

### VS3 VIDEO SESSION

**Poster area 2nd floor**

**07:30–08:30**

**Video session without authors**

For details view p. 88

SCIENTIFIC PROGRAM

SATURDAY | JUNE 21, 2014

PROGRAM DETAILS

09:30–09:40  Moderator: Marco Caversaccio (Bern, Switzerland)  
              Oliviers Sterkers (Clichy, France)

Panel discussion

Panelists:  Brett Bell (Bern, Switzerland)  
           Alexis Bozorg Grayeli (Dijon, France)  
           Thomas Klenzner (Duesseldorf, Germany)  
           Omid Majdani (Hanover, Germany)  
           Yann Nguyen (Paris, France)  
           Frederic Venail (Montpellier, France)

RT11  ROUND TABLE

08:30–10:30  **Challenging situations for middle ear implants**

Chair &  Ad Snik (Nijmegen, The Netherlands)
Moderation:  Matthias Tisch (Ulm, Germany)

Panel Discussion

Panelists:  Maurizio Barbara (Rome, Italy)  
           Wolf-Dieter Baumgartner (Vienna, Austria)  
           Pu Dai (Beijing, China)  
           Henning Frenzel (Luebeck, Germany)  
           Javier Gavilán (Madrid, Spain)  
           Jean Pierre Lavielle (Marseille, France)  
           John Martin Hempel (Munich, Germany)  
           Christoph Matthias (Mainz, Germany)  
           Robert Mlynski (Wuerzburg, Germany)  
           Burkard Schwab (Hanover, Germany)  
           Henriy Skarzynski (Warsaw, Poland)

Including:

RT11-2  Round window vibroplasty in open cavities: long term audiological and surgical issues
        Javier Gavilán (Madrid, Spain)

RT11-3  Retrosigmoid implantation of the Bonebridge™ bone conduction implant in patients
        with chronic otitis media
        Javier Gavilán (Madrid, Spain)

S37  SCIENTIFIC SESSION

08:30–09:30  **Rehabilitation**

Chair:  Gottfried Diller (Heidelberg, Germany)  
        Eva Kartorp (Stockholm, Sweden)

08:30–08:50  S37-1  **LENA technology: a window into spoken language access for children**
              with cochlear implants
              Christine Yoshinaga-Itano (Boulder, United States)

08:50–09:10  S37-2  How to implement LENA in clinical practice
              Ulrika Löfkvist (Oslo, Norway)

09:10–09:30  Discussion

P1-11  ePOSTER SESSION

08:30–09:30  **Auditory neuropathy**
              For details view p. 110

P2-10  ePOSTER SESSION

08:30–10:30  **Sound coding**
              For details view p. 110
# Saturday, June 21, 2014

## Hands-on Workshop IX

**Temporal Bone Lab**

**Instructors:**
- Abdulrahman Hagr (Riyadh, Saudi Arabia)
- Heidi Olze (Berlin, Germany)
- Matthias Vischer (Bern, Switzerland)

**Tutors:**
- Stefan Volkenstein (Bochum, Germany)
- Martin Patscheider (Munich, Germany)

### Scientific Session

**Philharmonie**

**Vestibular function and CI**

**Chair:**
- Herman Jenkins (Aurora, United States)
- Martin Westhofen (Aachen, Germany)

### PROGRAM DETAILS

**09:46–09:50**  
**S38-5** Self-rated quality of life after unilateral cochlear implantation and its correlation with audiological findings  
Cécile Parietti-Winkler (Nancy, France)

**09:50–09:54**  
**S38-6** CI in patients with single sided deafness – positive effects on various areas of life  
Heidi Olze (Berlin, Germany)

**09:54–09:58**  
**S38-7** Confrontation of quality of life to hearing performances in cochlear implantees  
Alexis Bozorg Grayeli (Dijon, France)

**09:58–10:06**  
**S38-8** Sound quality perception and quality of life in adults with profound bilateral deafness and unilateral cochlear implantation  
Luis Lassaletta (Madrid, Spain)

**10:06–10:10**  
**S38-9** Long-term quality-of-life outcomes (QOL) after cochlear implant  
Dona Jayakody (Subiaco, Australia)

**10:10–10:14**  
**S38-10** Speech recognition and quality of life one year after cochlear implantation in adults  
Elina Mäki-Torkko (Linköping, Sweden)

**10:14–10:18**  
**S38-11** Quality of life in young adults with cochlear implants  
Jenna Holke (New York, United States)

---

### SCIENTIFIC SESSION

**09:30–10:30**

**Vortragssaal der Bibliothek**

**Chair:** Kate Gfeller (Iowa City, United States)  
Yvonne Stelzig (Koblenz, Germany)

**09:30–09:34**  
**S39-1** Perception of emotions and movements in music by children with cochlear implants  
Virginia Driscoll (Iowa City, United States)

**09:34–09:42**  
**S39-2** Patterns of participation of pediatric CI recipients in formal music instruction: factors influencing persistence and success  
Kate Gfeller (Iowa City, United States)

**09:42–09:46**  
**S39-3** Perception of spectrally complex music and speech sounds: the impact of musical training on behavioral and CAEP outcomes  
Kate Gfeller (Iowa City, United States)

**09:46–09:50**  
**S39-4** Development and evaluation of a music rehabilitation program with adult cochlear implant users  
Rachel van Besouw (Southampton, United Kingdom)

**09:50–09:54**  
**S39-5** Participation of children with cochlear implants in music education and activities: effects of family involvement  
Virginia Driscoll (Iowa City, United States)

**09:54–09:58**  
**S39-6** Toward a model of music complexity for cochlear implants  
Waldo Nogueira Vazquez (Hanover, Germany)

**09:58–10:02**  
**S39-7** An analysis of the music perception and appreciation of pre- and postlingually deafened adult cochlear implant recipients  
Michelle Moran (Melbourne, Australia)

**10:02–10:06**  
**S39-8** A qualitative assessment of pitch-perception skills of cochlear implant and hearing aid users  
Dona Jayakody (Subiaco, Australia)
**RT12 ROUND TABLE**

**Kleiner Konzertsaal**

**Program Details**

**09:30–10:30**

**RT12**

**Deep insertion vs. shallow insertion**

**Chair & Moderation:**
Gunesh Rajan (Fremantle, Australia)
Katrien Vermeire (Antwerp, Belgium)

**Introduction: rate and place coding: which is the real pitch?**
David Landsberger (New York, United States)

**Panel discussion**

**Panelists:**
Robert Briggs (East Melbourne, Australia)
Angel Ramos (Las Palmas, Spain)
Hinrich Staecker (Kansas City, United States)
Paul Van de Heyning (Antwerp, Belgium)

**P1-12 ePOSTER SESSION**

**ePoster 1**

**09:30–10:00**

**ABI – Auditory Brainstem Implants**

For details view p. 111

**10:30–11:00 Coffee break**

**S40 SCIENTIFIC SESSION**

**Philharmonie**

**The single sided deaf child (SSD)**

**Chair:**
Karin Schorn (Munich, Germany)
Ona Bo Wie (Oslo, Norway)

**11:00–11:12**

**S40-1 The unilaterally hearing-impaired child**
Annette Leonhardt (Munich, Germany)

**Invited talk**

**11:12–11:16**

**S40-2 Management of single side deafness in the pediatric population: a survey of current UK practice**
Justine Maggs (Birmingham, United Kingdom)

**11:16–11:20**

**S40-3 Unilateral hearing loss in infants: why one ear is not enough**
Yetta Abrahams (Sydney, Australia)

**11:20–11:24**

**S40-4 Single sided deafness in children – a first case study**
Silke Kunze (Munich, Germany)

**11:24–11:28**

**S40-5 Cochlear implant for rehabilitation of unilateral deafness in children: first experiences**
Dayse Tavora-Vieira (Perth, Australia)

**11:28–11:36**

**S40-6 Rehabilitation of children with single side deafness after cochlea implantation**
Sandra Scholtz (Potsdam, Germany)

**11:36–11:40**

**S40-7 Audioligical results of single sided deaf children with cochlear implants**
Sebastian Thömmes (Wuerzburg, Germany)

**11:40–11:44**

**S40-8 Psychological/audiological follow up in unilateral deaf children with cochlear implant**
Heike Kühn (Wuerzburg, Germany)

**11:44–11:48**

**S40-9 Detection of partial deafness during hearing screening in school age children**
Anna Piotrowska (Kajetany/Warsaw, Poland)

**11:48–12:33**

Panel discussion

**Moderation:**
Susan Arndt (Freiburg, Germany)
Joachim Müller (Munich, Germany)

**Panelists:** TBA
### S41 SCIENTIFIC SESSION

**Carl-Orff-Saal**

**11:00–12:00**

#### Maturation and plasticity

**Chair:** Jochen Tillein (Frankfurt, Germany)  
Eric Truy (Lyon, France)

**11:00–11:04**  
**S41-1** The role of the auditory cortex in pediatric cochlear implantation – a need for focused research  
Jane Black (Brisbane, Australia)

**11:04–11:12**  
**S41-2** Long-term electrophysiological survey of auditory maturation in cochlear implantees  
Eric Truy (Lyon, France)

**11:12–11:16**  
**S41-3** Molecularly regulated neuroplasticity in childhood deafness treated with cochlear implantation – results of first study  
Monika Matusiak (Warsaw, Poland)

**11:16–11:20**  
**S41-4** Neuronal coding of interaural time differences in the long deaf auditory system: effects of age at deafness onset  
Martin Kempe (Wuerzburg, Germany)

**11:20–11:24**  
**S41-5** Evidence of electrophysiological changes in deaf children of Cuban cochlear implant program  
Lidia Charroó-Ruiz (Havana, Cuba)

**11:24–11:32**  
**S41-6** Effects of single sided deafness (SSD) on binaural processing in the primary auditory cortex of cats  
Jochen Tillein (Frankfurt, Germany)

**11:32–11:40**  
**S41-7** Brain responses to language-relevant musical features in adolescent cochlear implant users before and after an intensive music training program  
Bjørn Petersen (Aarhus, Denmark)

**11:40–11:44**  
**S41-8** PET scan evidence of prognostic value of visual cross-modal reorganisation after adult cochlear implantation  
Olivier Deguine (Toulouse, France)

**11:44–11:52**  
**S41-9** A frequency-place map for electrical stimulation in cochlear implants: change over time  
Katrien Vermeire (Antwerp, Belgium)

### RT13 ROUND TABLE

**Black Box**

**11:00–12:00**

#### Severe otosclerosis: stapes surgery or CI?

**Chair & Moderation:** Shakeel Saeed (London, United Kingdom)  
Robert Vincent (Béziers, France)

Panel discussion

**Panelists:**  
Jean-Pierre Bébear (Bordeaux, France)  
Carlos Curet (Cordoba, Argentina)  
Imre Gerlinger (Pecs, Hungary)  
Bernard Gil Fraysse (Toulouse, France)  
Thomas Lenarz (Hanover, Germany)  
Harold Pillsbury (Chapel Hill, United States)

Including:

**RT13-2** Otosclerosis and cochlear implants: technical features, medium and long-term results  
Jean-Pierre Bébear (Bordeaux, France)

**RT13-3** Cochlear implant in far advanced otosclerosis. Performance-complications: long term results  
Carlos Curet (Cordoba, Argentina)

**RT13-4** Far advanced otosclerosis: stapedotomy or cochlear implantation  
Bilal Kabbara (Toulouse, France)

**RT13-5** Active middle ear implants: an alternative to improve hearing in advanced otosclerosis  
Mario Zernotti (Cordoba, Argentina)
**RT14 ROUND TABLE**

**Chorprobensaal**

**11:00–12:00**

**Treasure the memory of Siebold – Japanese-German friendship**

Chair & Moderation:

- Haruo Takahashi (Nagasaki, Japan)
- Jan Helms (Tuebingen, Germany)

**RT14-1** Treasure the memory of Siebold – Japanese-German friendship

- Haruo Takahashi (Nagasaki, Japan)

**RT14-2** Being doctor – being patient

- Yukihiko Kanda (Nagasaki, Japan)

**RT14-3** Estimation of the cochlear duct length for MED-EL standard electrode arrays

- Norio Yamamoto (Kyoto, Japan)

Panel discussion

Panelists:

- Katsumi Doi (Osaka-Sayama, Japan)
- John Martin Hempel (Munich, Germany)
- Roland Laszig (Freiburg, Germany)
- Joachim Müller (Munich, Germany)
- Tetsuya Tono (Myazaki, Japan)
- Shin-Ichi Usami (Matsumoto, Japan)

---

**S42 SCIENTIFIC SESSION**

**Vortragssaal der Bibliothek**

**11:00–12:00**

**Outcomes in children incl. multihandicaped children**

Chair:

- Silvia Breuning (Buenos Aires, Argentina)
- Maria Huber (Salzburg, Austria)

**11:00–11:04**

**S42-1** Auditory perception in cochlear implanted children with additional disabilities

- Leila Monshizadeh (Shiraz, Iran)

**11:04–11:08**

**S42-2** Predictors of language and auditory skills in Egyptian children with cochlear implant

- Asmaa Abdel Hamid (Cairo, Egypt)

**11:08–11:12**

**S42-3** Comparison of the speech syntactic features between hearing-impaired and normal hearing children

- Hamid Tayarani Niknezhad (Mashhad, Iran)

**11:12–11:16**

**S42-4** Auditory feedback of speech production in children with cochlear implants and hearing aids

- Inna Koroleva (St. Petersburg, Russia)

**11:16–11:20**

**S42-5** Early cognitive and listening links: early call. The development and implementation of a profile to record the long term progress following cochlear implantation of children with severe to profound and multiple learning difficulties

- Amanda Odell (Nottingham, United Kingdom)

**11:20–11:24**

**S42-6** Results of cochlear implantation in children with auditory neuropathy spectrum disorder

- Natalie Loundon (Paris, France)

**11:24–11:28**

**S42-7** Perception, speech and intelligibility rate in profound deaf children with cochlear implantation after congenital cytomegalovirus infection

- Natalie Loundon (Paris, France)

**11:28–11:32**

**S42-8** Evaluation of quality of life, vertigo and auditotry and language development in pediatric CI-users

- Józef Mierzwiński (Bydgoszcz, Poland)

**11:32–11:40**

**S42-9** Electrical complementation and electric acoustic stimulation in younger children after partial deafness treatment

- Malgorzata Zgoda (Kajetany/Warsaw, Poland)

**11:40–11:44**

**S42-10** Outcomes of cochlear implantation in children with CHARGE syndrome

- Joong Ho Ahn (Seoul, Korea)

**11:44–11:48**

**S42-11** Bilateral hearing in pre-school children with cochlear implants

- Anita Obrycka (Kajetany/Warsaw, Poland)

## SATURDAY | JUNE 21, 2014

### PROGRAM DETAILS

#### P2-11 ePOSTER SESSION

**Complications**
For details view p. 114

#### TB10 HANDS-ON WORKSHOP X

Temporal bone

**Instructors:** Vladimir Kuzovkov (Saint-Petersburg, Russian Federation)
Manikoth Manoj (Calicut, India)

**Tutors:** Martin Patscheider (Munich, Germany)
Stefan Volkenstein (Bochum, Germany)

#### S44 SCIENTIFIC SESSION

**Support & aftercare assistive, listening devices, growing populations**

**Chair:** Liat Kishon-Rabin (Tel-Aviv, Israel)
Caroline Krön (Munich, Germany)

**12:00–12:08 S44-1**
10-year outcomes from a high-level sattelite CI center
Douglas Backous (Seattle, United States)

**12:08–12:16 S44-2**
Review of demographic characteristics of the cochlear implant recipients at an established cochlear implant program in Riyadh, Saudi Arabia
Sara AlMuhlem (Riyadh, Saudi Arabia)

**12:16–12:20 S44-3**
Cochlear implantation – what it takes to sustain & maintain?
Nishita Mohandas (Mumbai, India)

**12:20–12:24 S44-4**
HELP! My sound processor does not work: cochlear connect, a new technology to enhance service support
Saji Maruthurkkara (Macquarie University, Australia)

**12:24–12:32 S44-5**
Cochlear implant self-fitting
Saji Maruthurkkara (Macquarie University, Australia)

**12:32–12:36 S44-6**
Wireless, portable, pediatric cochlear implant fitting via the nucleus remote assistant: transforming service delivery
Yetta Abrahams (Sydney, Australia)

**12:36–12:44 S44-7**
Rehabilitation, inclusion and inclusive education of children with hearing impairment in developing countries and supportive projects
Dagmar Herrmannova (Prague, Czech Republic)

#### S45 SCIENTIFIC SESSION

**Endoscopic cochlear implantation**

**Chair:** Thomas Klenzner (Duesseldorf, Germany)
Lela Migirov (Sheba, Israel)

**12:00–12:12 S45-1**
The feasibility of endoscopic transcanal approach for insertion of various cochlear electrodes
Lela Migirov (Sheba, Israel)

**12:12–12:20 S45-2**
Cochlear implant surgery through natural orifices
Victor Slavutsky (Barcelona, Spain)

**12:20–12:28 S45-3**
Report of endoscopic cochlear implantation
Miriam Redleaf (Chicago, United States)

**12:28–12:36 S45-4**
Endoscope assisted cochlear implantation via the suprameatal approach
Mohamed Badr-El-Dine (Alexandria, Egypt)

**12:36–12:44 S45-5**
Endoscopic cochlear implantation in inner/middle ear malformations
Daniele Marchioni (Modena, Italy)
### PROGRAM DETAILS

**SATURDAY | JUNE 21, 2014**

#### S45-6
**Advantages, disadvantages and future perspectives of endoscopic CI**
João Flávio Nogueira (Fortaleza, Brazil)

#### S45-7
**A call for caution**
Muaaz Tarabichi (Dubai, United Arab Emirates)

---

#### RT15  
**ROUND TABLE**

**Kleiner Konzertsaal**

**12:00–13:00**

**Tinnitus and non-auditory side effects**

- **Chair** & **Moderation:** Marcus Atlas (Perth, Australia) Heidi Olze (Berlin, Germany)
- **Panelists:**
  - Marcus Atlas (Perth, Australia)
  - Robert Briggs (East Melbourne, Australia)
  - Yukihiko Kanda (Nagasaki, Japan)
  - Elena Levin (St.Petersburg, Russia)
  - Angel Ramos (Las Palmas, Spain)
  - Winfried Schlee (Regensburg, Germany)
  - Hinrich Staeker (Kansas City, United States)
  - Paul Van de Heyning (Antwerp, Belgium)
- **Including:**
  - RT15-2 A consideration about the tinnitus suppressing effect by cochlear implant Yukihiko Kanda (Nagasaki, Japan)
  - RT15-3 Moment-to-moment variability of the auditory phantom perception in chronic tinnitus Winfried Schlee (Regensburg, Germany)
  - RT15-4 Cochlear implantation in patients with tinnitus Elena Levin (St.Petersburg, Russia)
  - RT15-5 Systematic review of cochlear implantation and tinnitus Marcus Atlas (Perth, Australia)

#### P2-12  
**ePOSTER SESSION**

**ePoster 2**

**12:00–13:00**

**Quality of life and economics**

For details view p. 116

#### OTHERS

**Kleiner Konzertsaal**

**13:00–13:15**

**Announcement and farewell**

**13:15–14:00**

**Lunch**
**Patients Forum**

**Black Box**

**14:00–18:00**

**Patients session in German language**

**Moderation:** Stefanie Rühl (Munich, Germany)  
Regine Zille (Munich, Germany)

**14:00–14:15**

Begrüßung  
Stefanie Rühl (Munich, Germany)  
Regine Zille (Munich, Germany)

**14:15–14:35**

Vorstellung des Bayerischen Cochlea Implantat Verband e. V.  
Regine Zille (Munich, Germany)

**14:35–14:55**

CI-Nachsorge an der LMU  
Sandra Gollwitzer (Munich, Germany)

**14:55–15:15**

Kongress Neuheiten im Bereich der Rehabilitation  
Caroline Krön (Munich, Germany)  
Stephanie Rühl (Munich, Germany)

**15:15–15:30**

CI-Forschung an der LMU  
Daniel Visser (Munich, Germany)

**15:30–16:30**

Moderation:  
Kaffeepause und Austausch von CI-Betroffenen mit niedergelassenen HNO-Ärzten  
Caroline Krön (Munich, Germany)  
Regine Zille (Munich, Germany)

**16:30–16:50**

Sanfte Narkose zur Cochlea- und Hörimplantatversorgung  
Tanija Hüttl (Munich, Germany)

**16:50–17:10**

Neues bei der CI-Chirurgie  
Joachim Müller (Munich, Germany)

**17:10–17:30**

Die CI-OP aus der Sicht einer OP-Schwester  
Martina Fischer (Munich, Germany)

**17:30–17:45**

Neues bei aktiven Mittelohrimplantaten  
John Martin Hempel (Munich, Germany)

**17:45–18:00**

Stimme und CI  
Elke Maria Schuster (Munich, Germany)

**Others**

**Kleiner Konzertsaal**

**14:00–16:00**

**Cochlear implants & hearing implants compact, structured session & round table in German language**

**Chair & Moderator:** Barbara Arnold (Munich, Germany)  
Bernhard Junge-Hülsing (Starnberg, Germany)

Cochlear implants – a remarkable past and a brilliant future  
Blake Wilson (Durham, United States)

Rundtischgespräch: Was der niedergelassene HNO Arzt über Cochlea Implantate wissen möchte  
John Martin Hempel (Munich, Germany)  
Joachim Müller (Munich, Germany)  
Blake Wilson (Durham, United States)

Lernzielkontrolle
BOOKING YOUR OWN CONFERENCE TRAVEL IS EASY AS ABC
WITH THE GLOBAL ONLINE BOOKING TOOL FROM STAR ALLIANCE CONVENTIONS PLUS

No matter where you are travelling from, the Star Alliance™ network offers you a wide choice of flights to the 13th International Conference on Cochlear Implants and Other Auditory Technologies in Munich, Germany.

And with over 18,000 flights a day to 1,269 destinations across 193 countries, our 26 member airlines extend the same choice to any future conferences you are planning to attend.

You can also save money when you book your flights. Simply quote the Convention Code LH21S14 and you plus one travelling companion will receive a special discount. Better still, no matter which Star Alliance member airline’s frequent flyer programme you belong to, you can earn and redeem miles across all 26 airlines.

For more information, or to join the airline network that offers you more choice wherever your conferences take you, simply go to www.staralliance.com/conventionsplus

P1-1 ePOSTER SESSION

10:30–11:45

Anatomy beauty of the cochlea
Chair: Helge Rask Andersen (Uppsala, Sweden)
Waldemar Würfel (Hanover, Germany)
P1-1-1 Optical coherence tomography guided inner ear decalcification and cochlear anatomy
Saleh Mohebbi (Hanover, Germany)
P1-1-2 Cochlear Coverage – objective metric parameters in cochlear implant imaging for the individual cochlear length
Waldemar Würfel (Hanover, Germany)
P1-1-3 Cochlear duct length estimation: adaptation of escude’s equation
Wilhelm Wimmer (Bern, Switzerland)
P1-1-4 Estimation of Cochlear duct length by a logarithmic spiral model
Waldemar Würfel (Hanover, Germany)
P1-1-5 Review of cochlea anatomy
Yalda Jabbari Moghaddam (Tabriz, Iran)
P1-1-6 High resolution computed tomography based length assessments of the cochlea – an accuracy evaluation
Ulrich Kisser (Munich, Germany)
P1-1-7 Numerical simulations of the cochlear implant electrode insertion
Romuald Dobosz (Warsaw, Poland)
P1-1-8 Human cochlea: semi-automatic anatomical measurements on μCT 3D surface models
Hans Kjer (Lyngby, Denmark)
P1-1-9 Multichannel cochlear implant in the Mongolian Gerbil
Armin Wiegner (Wuerzburg, Germany)
P1-1-10 Pax2 and Sox2 can induce hair cell fate in inner ear progenitors
Judith Kempfle (Boston, United States)
P1-1-11 Towards a stem cell-based “otoxic hearing loss-in-a-dish” model
Marcus Müller (Tuebingen, Germany)
P1-1-12 Regenerative stem cell therapy with umbilical cord mesenchymal stromal cells in deaf animal model
Sung-Hun Lee (Seoul, Korea)
P1-1-13 Auditory nerve plasticity follow up by ECAP in patients with AN/AD after cochlear implant
Leila Azadeh Ranjbar (Tehran, Iran)
P1-1-14 Cochlear implant users show an auditory attentional filter in an acoustic listening task
Dona Jayakody (Subiaco, Australia)

P1-2 ePOSTER SESSION

11:45–12:30

Radiology
Chair: Isabelle Mosnier (Paris, France)
Dirk Mürbe (Dresden, Germany)
P1-2-1 Virtual endoscopy to plan transcanal and transtympanic approaches to labyrinthine windows
Caroline Guigou (Dijon, France)
P1-2-2 Cochlear rotation: preoperative radiological evaluation and significance
Mohnish Grover (Jaipur, India)
P1-2-3 Radiologic sings of dwarf cochlea and its implication in cochlear implant surgery
Mahmod El Tarabishi (Cairo, Egypt)
P1-2-4 Cone beam CT vs micro CT of the temporal bone to determine cochlear size measurements for electrode choice in cochlear implantation surgery
Kayvan Nateghifard (Toronto, Canada)
| P1-2-5 | Pre-operative CT assessment of candidates for the Bonebridge system  
Katarzyna Ciesla (Warsaw, Poland) |
| P1-2-6 | Radiological and surgical planning: evaluation of two different placement strategies  
Peter Grasso (Innsbruck, Austria) |
| P1-2-7 | The comparison of the insertion results in patients implanted bilaterally with the Cochlear Contour Advance™ and the Slim Straight™ electrode  
Aarno Dietz (Kuopio, Finland) |
| P1-2-8 | Evaluation of the intra-cochlear position of the new HiFocus Mid-Scala electrode array  
Jeroen Briaire (Leiden, The Netherlands) |
| P1-2-9 | Cone beam computed tomography in postoperative imaging of cochlear electrodes  
Christian Güldner (Marburg, Germany) |
| P1-2-10 | Evaluation of the cochlea duct anatomy and of the electrode array placement by cone beam computer tomography  
Isabelle Mosnier (Paris, France) |
| P1-2-11 | In vivo measurements of the insertion depth angle and its variability depending on cochlear size for Nucleus CI422 recipients  
Dirk Mürbe (Dresden, Germany) |
| P1-2-12 | Evaluation of MRI artifacts caused by hearing implants in cadaver heads: assessment of the internal auditory canal  
Jan Wagner (Berlin, Germany) |
| P1-2-13 | Radiological estimation of length of basal turn of cochlea in Indian population  
Asish Lahiri (New Delhi, India) |
| P1-2-14 | CT and MRI findings of the temporal bone in CHARGE syndrome: aspects of importance in cochlear implant surgery  
Emmanuel Mylanus (Nijmegen, The Netherlands) |
| P1-2-15 | Exostoses of the internal auditory canal: 10 years follow-up  
Guilherme Coelho (Campinas, Brazil) |

**ePOSTER SESSION**

**ePoster 1**

**13:30–15:00**

**ePoster 1**

**Hearing & structure preservation I**

**Chair:** Kevin Green (Manchester, United Kingdom)  
Pascal Senn (Bern, Switzerland)

**P1-3-1** Hearing preservation; expanding criteria in pediatric cochlear implantation  
Konstantina Tzifa (Birmingham, United Kingdom)

**P1-3-2** Round window and cochleostomy approaches for hearing preservation in cochlear implantation  
Monica Rodriguez-Valero (Manchester, United Kingdom)

**P1-3-3** Does the place of the electrode insertion influence the average insertion depth: a multicentric study on HiFocus 1j electrode?  
Neelam Vaid (Pune, India)

P1-7-23 The development of linguistic abilities in children with profound prelingual sensory-neural hearing loss. Comparison of cochlear implant and hearing aid users
Petros Stagiopoulos (Thessaloniki, Greece)

P1-7-24 Assessment of auditory development in infants with use of questionnaires
Jolanta Serafin-Jozwiak (Kajetany/Warsaw, Poland)

P1-7-25 Auditory performance and language development in implanted children followed in Rabat
Fouad Benariba (Rabat, Morocco)

P1-7-26 Systematic newborn hearing screening program at Beni Messous hospital in Algiers
Omar Zemirli (Algiers, Algeria)

P1-7-27 Impact of Universal Newborn Hearing Screening Programme on early intervention and cochlear implantation
Lejla Piric (Tuzla, Bosnia and Herzegovina)

P1-7-28 First analysis Newborn Hearing Screening Program in Algeria
Mokhtar Hasbellsou (Algiers, Algeria)

P1-7-29 Cochlear implant in children with congenital deafness identified by neonatal hearing screening program
Sebastian Cozma (Iasi, Romania)

P1-7-30 Educational placement of pre-lingually deaf children who received cochlear implant between 5 to 10 years of age
M. Iqbal Khan (Bradford, United Kingdom)

P1-7-31 Cochlear implant in child: auditory, language abilities and school integration
Abderahmane Saidia (Annaba, Algeria)

P1-7-32 Comparison of speech discrimination and comprehension of cochlear implant users: computer produced speech versus live voice
Aggeliki Teligiannidou (Thessaloniki, Greece)

P1-7-33 Performance differences between recorded and live voice speech audiometry in implanted children
Argyrios Krommydas (Thessaloniki, Greece)

P1-7-34 Correlation analysis of LittleEars®-questionnaire and A$E® in cochlear implanted children
Diana Arweiler-Harbeck (Essen, Germany)

P1-7-35 Happiness in Iranian cochlear implanted adolescents
Guita Movallali (Tehran, Iran)

P1-7-36 Restoration of hearing with cochlear implant in asymmetric and unilateral deafness in children
Carlos Curet (Cordoba, Argentina)

P1-7-37 Clinical study of MED-EL new speech processor (RONDO) for child
Hazama Michio (Izumisano, Japan)

P1-7-38 An examination of the relationship between tone perception and tone production on Mandarin-speaking children with cochlear implants
Hui-Ping Lu (Tainan, Taiwan)
### Surgical issues: revision/re-implantation, malformation & robotic surgery

**Chair:**
- Javier Gavilán (Madrid, Spain)
- Michael Tong (Hong Kong)

**P1-8-1** Morphological aspect of the transattical approach for cochlear implantation  
Dragoslava Djerić (Belgrade, Serbia)

**P1-8-2** Round window electrode insertion in the inner ear pathology  
Vladislav Kuzovkov (Saint Petersburg, Russia)

**P1-8-3** Cochlear implant surgery through natural orifices: the endomeatal approach (EMA)  
Victor Slavutsky (Barcelona, Spain)

**P1-8-4** Cochlear implantation through the round window: optimizing the surgical procedure  
Thierry Mom (Clermont-Ferrand, France)

**P1-8-5** Long term results of an alternative technique for cochlear implantation: the transattical approach  
Miguel Vaca (Madrid, Spain)

**P1-8-6** The modified transcanal approach revisited: technique and results  
Badr Mostafa (Cairo, Egypt)

**P1-8-7** The trans-attic transcanal approach for cochlear implantation, a safer and effective technique  
Waleed Ezzat (Cairo, Egypt)

**P1-8-8** Concept for an ideal process of cochlear implantation  
Tilman Keck (Graz, Austria)

**P1-8-9** Using a sub-periosteal pocket: do we need to drill an implant bed for the Flex 28 cochlear implant?  
Andy Hall (London, United Kingdom)

**P1-8-10** Covering the mastoid cavity with a “Bone Cap” in cochlear implantation  
Hsiao-Yun Cho (Taipei, Taiwan)

**P1-8-11** A surgical survey on the usability and applicability of the HiFocus Mid-Scala electrode  
Dzemal Gazibegovic (Cambridge, United Kingdom)

**P1-8-12** New cochlear implant philosophy – fully implantable device  
Predrag Spirc (Banja Luka, Bosnia and Herzegovina)

**P1-8-13** Simultaneous endolymphatic sac drainage and cochlear implantation in patients with Menière’s disease  
Andrey Lilenko (Saint Petersburg, Russia)

**P1-8-14** Management of CSF gusher in cochlear implantation  
Ali Eftekharian (Tehran, Iran)

**P1-8-15** Evaluation of internal receiver migration in cochlear implantation using subperiosteal pocket technique  
Kadir Serkan Orhan (Istanbul, Turkey)

**P1-8-16** Surgical challenges during electrode insertion in cochlear implants  
Maciej Mrowka (Warsaw, Poland)

**P1-8-17** Cochlear implantation in the obliterated cochlea  
Amr Rabie (Cairo, Egypt)

**P1-8-18** Cochlear implant in cochlear ossification. Surgical options  
Luciano Mendonça (Buenos Aires, Argentina)

**P1-8-19** Approach to the second turn of cochlea in cases of cochlear ossification  
Khassan Diab (Saint Petersburg, Russia)

**P1-8-20** Cochlear implantation in patients with ossified cochlea: surgical techniques and outcomes  
Kheireddine Ouennoughi (Algiers, Algeria)
P1-8-21  The long-term outcome of cases with cochlear implantation due to advanced otosclerosis and van der Hoeve syndrome  
Takeru Misawa (Tokyo, Japan)

P1-8-22  CI surgical technique and post-op auditory benefit for cases with cochlear ossification  
Daoxing Zhang (Beijing, China)

P1-8-23  Cochlear implants in children with anomalous cochleovestibular anatomy  
Saumitra Shah (Surat, India)

P1-8-24  Cochlea implantation via a superior cochleostomy in incomplete partition type III  
Joachim Schmutzhard (Innsbruck, Austria)

P1-8-25  Mastoid obliteration versus hyperosmolar protocol during cochlear implantation in malformed inner ear with high gusher risk  
Sofiane Ouhab (Algiers, Algeria)

P1-8-26  Outcomes in cochlear implantation in patients with cochlear malformations following minimal invasive transcanal technique  
Nenad Arsovic (Belgrade, Serbia)

P1-8-27  Outcomes of cochlear implantation in Japanese children with malformation of the cochlea and/or cochlear nerve  
Minoru Hara (Nagasaki, Japan)

P1-8-28  Malformations of the inner ear in profound sensorineural deafness  
Foued Hadj Allal (Tlemcen, Algeria)

P1-8-29  Cochlear implant in chronic otitis media  
Luciano Mendonça (Buenos Aires, Argentina)

P2-5  ePOSTER SESSION

13:30–15:00  ePoster 2

Cochlear implants around the world

Chair:  Dong-Yi Han (Beijing, China)
        Joachim Müller (Munich, Germany)

P2-5-1  Facilitating mindful communication  
Domitille Lochet (Miami, United States)

P2-5-2  Profile of the patients implanted in a cochlear implant program in Recife-PE-Brazil  
Raquel Nogueira (Recife, Brazil)

P2-5-3  Cochlear implants in the middle east (1983–2013)  
Aziz Belal (Alexandria, Egypt)

P2-5-4  Cochlear implant program in North Sumatera and South Sulawesi provinces in Indonesia  
Devira Zahara (Medan, Indonesia)

P2-5-5  Cochlear implant program in East Java in Indonesia  
Sulantari Sulantari (Surabaya, Indonesia)

P2-5-6  Cochlear implant outcomes at the ENT Ha Noi Hospital during August 2012 and August 2013  
Chau Luong (Ha Noi, Viet Nam)

P2-5-7  Cochlear implant program in Mongolia  
Ulziibayar Agvaandorj (Ulanbaatar, Mongolia)

P2-5-8  Cochlear implant program in Myanmar  
Win Kyi (Yangon, Myanmar)

P2-5-9  Hearing implants around the world – CI in Taiwan  
Kuang Chao Chen (Taipei, Taiwan)

P2-5-10  Cochlear implants in cochlear malformations: the experience of Vietnam National Hospital of Pediatrics  
Xuong Nguyen (Hanoi, Viet Nam)

P2-5-11  Cochlear implants in South Africa  
Suryn Lombaard (Cape Town, South Africa)
**FRIDAY | JUNE 20, 2014**

**15:00–16:30 ePoster 1**

**Difficult patients, atypical or challenging situations**

**Chair:** Katsumi Doi (Osaka-Sayama, Japan)
Melanie Teschendorf (Essen, Germany)

P1-9-1 | Learning to listen when you can’t sit still; a pre-school child with balance dysfunction | Lyndsey Allen (Nottingham, United Kingdom) |

P1-9-2 | Cochlear implantation in children with cerebral palsy | Andrea Bacciu (Parma, Italy) |

P1-9-3 | Cuban cochlear implant program: eight years of experiences with deaf and deafblind children | Antonio Paz Cordovés (Havana, Cuba) |

P1-9-4 | Cochlear implantation in children with sickle cell disease | Katherine Wilson (London, United Kingdom) |

P1-9-5 | Hearing implant treatment of patients with thalidomide associated middle and inner ear malformations | Benjamin Kansy (Essen, Germany) |

P1-9-6 | Cochlear Implantation in a girl with left internal auditory canal stenosis and very small strip of nerve: a case report | Tulakan Mukkun (Muang, Thailand) |

P1-9-7 | Pediatric vestibulo-cochlear malformations and international collaboration for the UK’s first bilateral Form19 electrode cochlear implantation | Jonathan Joseph (Mid Glamorgan, United Kingdom) |

P1-9-8 | Cochlear implantation in a patient with multiple ear and skull base anomalies | Riad Khnifes (Haifa, Israel) |

P1-9-9 | A rare case of petrous apex cholesteatoma | Gunta Sumeraga (Riga, Latvia) |

P1-9-10 | Digisonic® SP Binaural cochlear implantation in a patient with left deafness in cholesteatoma and right severe-profound hearing loss | Marco Perotti (Alessandria, Italy) |

P1-9-11 | Cochlear implantation following therapy of acoustic neuroma | Jörg Langer (Halberstadt, Germany) |
PI-9-12 Cochlear implant, the best option in patient with neufibrmatosis type 2 underwent radiosurgery
Patricia Pimentel (Recife, Brazil)

PI-9-13 Simultaneous cochlear implantation and translabyrinthine removal of vestibular schwannoma
Katsumi Doi (Osaka-Sayama, Japan)

PI-9-14 Cochlear implant as an alternative treatment for deafness caused by vestibular schwannomas: a case report
Federico Di Lella (Ciudad de Buenos Aires, Argentina)

PI-9-15 Cochlear implantation in a patient with prior medulloblastoma
Zebunissa Vanat (Cambridge, United Kingdom)

PI-9-16 Cochlear implantation in otosclerosis: audiological concerns
Karina Fanelli (Buenos Aires, Argentina)

PI-9-17 Outcomes of cochlear implantation in patients with far advanced otosclerosis
Talma Shpak (Haifa, Israel)

PI-9-18 Cochlear implantation in labyrinthitis ossificans
Milena Lavor (Campinas, Brazil)

PI-9-19 The CHARGE syndrome: about a case and literature review
Isma Brahami (Tlemcen, Algeria)

PI-9-20 Cochlear implantation on a patient with usher syndrome (Typel) by the MYO7A gene variation – a case report
Chiharu Kihara (Nagasaki, Japan)

PI-9-21 Cochlear implantation in children with Waardenburg Syndrome
Atsushi Kawano (Tokyo, Japan)

PI-9-22 Cochlear implantation in children with large vestibular aqueduct syndrome – timing of intervention, implantation strategy and post-implant management
Marsha Jenkins (London, United Kingdom)

PI-9-23 Case study of an adult cochlear implant patient with total non-auditory sensation unrelated to the facial nerve from first programming session and its management
Joanne Muff (Cambridge, United Kingdom)

PI-9-24 A case of auditory neuropathy spectrum disorder with a normal hearing threshold
Sung Wook Jeong (Busan, Korea)

PI-9-25 Three years after cochlear implantation girl of 25 – case report
Maja Jovanovic (Cetinje, Montenegro)

PI-9-26 Indications of cochlear implant in NF2: a report of 12 cases
Didier Bouccara (Paris, France)

PI-9-27 Cochlear implantation versus auditory brainstem implantation in bilateral total deafness after head trauma: personal experience and review of the literature
Lorenzo Lauda (Placenza, Italy)

PI-9-28 Single case report: word recognition after late unilateral cochlea implantation despite negative auditory nerve testing in a patient with acquired deafness due to infantile meningitis
Katharina Florek (Dresden, Germany)

PI-9-29 The clinical progress of simultaneous bilateral CI after meningitis with an IP-II anomaly
Mehmet Ozuar (Izmir, Turkey)

PI-9-30 Cochlear implantation in a child with brain infarction
Manuel Sevila Salas (La Habana, Cuba)

PI-9-31 Whole-exome sequencing identifies POU3F4 p.Ala116fs mutation in two brothers with hearing loss
Agnieszka Pollak (Kajetany/Warsaw, Poland)

PI-9-32 Effects and consequences of Digisonic SP cochlear implant on radiotherapy planning
Nicolas Guevara (Nice, France)
Three cases of cochlear implants placed after radiation induced severe hearing loss
Mio Tsutsumi (Sapporo, Japan)

Advanced Bionics® cochlear implants in patients with prelingual hearing loss
Fernando Fernandes (Campinas, Brazil)

Cochlear implantation on a patient with sudden-onset deafness due to otitis media with ANCA-associated vasculitis – a case report
Takeshi Watanabe (Nagasaki, Japan)

15:00–16:30

Bimodal/binaural hearing
Chair: John Culling (Cardiff, United Kingdom)
Christian Wirtz (Starnberg, Germany)

Outcome measures of electroacoustic hearing – a questionnaire to evaluate bimodal benefit
Joanne Edwards (Middlesbrough, United Kingdom)

Self-assessment of bimodal experiences in daily life
Elke M. J. Devocht (Maastricht, Netherlands)

Localisation ability: an evaluation of binaurally aided adults who become bimodal listeners
Louise Craddock (Birmingham, United Kingdom)

The benefit from contralateral hearing aid for cochlear implant recipients
Ye Yang (Nanjing, China)

Monaural and binaural auditory reaction times depend on spectrotemporal properties: normal-hearing and impaired-hearing simulation
Lidwien Veugen (Nijmegen, The Netherlands)

The Influence of residual hearing and the use of contralateral hearing aids associated to cochlear implants
Maria Valeria Schmidt-Goffi Gomez (Sao Paulo, Brazil)

Benefit of speech understanding with cochlear implantation of single-sided deaf patients
Thomas Kortmann (Kiel, Germany)

Determining the speech discrimination at the contralateral ear for BAHS using patients
Bahtiyar Celikgun (Istanbul, Turkey)

Speech recognition of bimodal cochlear implant in elderly adults
Choondong Kim (Seoul, Korea)

17:00–18:45

Rehabilitation for children – speech production, speech perception
Chair: Katrin Kral (Cologne, Germany)
Leandra Silva (Bauru, Brazil)

Identification of nasal vowels by French Parisian cochlear-implanted adults
Stéphanie Borel (Paris, France)

Analysis of rehabilitation results of children after cochlear implantation
Alexey Ivoylov (Moscow, Russia)

Speech intelligibility in sentences after reading and dictation training in children with prelingually hearing disabilities who use cochlear implants
Leandra Silva (Bauru, Brazil)

Language development and speech intelligibility of Egyptian children using cochlear implant
Ahmed Abdelmonem (Banisuef, Egypt)

The pediatric postoperative outcomes of the cochlear implant systems
Abderahmane Saïdia (Annaba, Algeria)
P1-10-6 Study to examine the feasibility of using radio aids (FM systems) in an aqueous environment, specifically school based swimming lessons with Cochlear Corporation processors
Colin Peake (Southampton, United Kingdom)

P1-10-7 Distant results of children hearing and speech development assessment after cochlear implantation
Andriy Zaytsev (Dnipropetrovsk, Ukraine)

P1-10-8 The Sibiu speech understanding test
Rodica Popescu (Sibiu, Romania)

P1-10-9 Language development in deaf children two years after cochlea implantation – results in the German language development test battery for two year old children (SETK-2)
Katrin Kral (Cologne, Germany)

P1-10-10 The retrospective analysis of the cochlear implantation effectiveness depending on the age of intervention
Gayane Sargsyan (Yerevan, Armenia)

P1-10-11 Preschool television programs: analysis using SmartSound IQ data logging
Kate Hanvey (Birmingham, United Kingdom)

P1-10-12 Long term outcomes in cochlear implanted children
Nadia Djerad (Annaba, Algeria)

P1-10-13 Auditory performance and speech intelligibility of Mandarin-speaking children implanted before age 5
Chang-Wei Huang (Taichung City, Taiwan)

P1-10-14 Children with cochlear implants and cerebral palsy – selection, rehabilitation, outcomes
Branka Mikic (Belgrade, Serbia)

P1-10-15 Performance of children with additional disabilities after cochlear implantation
Omar Zemirli (Algiers, Algeria)

P1-10-16 CI children with complex needs and new rehabilitation material supporting this population
Dagmar Herrmannova (Prague, Czech Republic)

P1-10-17 Requests of cochlear implantation(CI) in multihandicaped children
Jessica Tausch (Duesseldorf, Germany)

P1-10-18 Outcomes of cochlear implantation in deaf children with associated disabilities
Izabela Kelar (Szczezin, Poland)

P1-10-19 Cochlear implant in children: auditory, language abilities and school integration
Isabelle Ruzza (Lille, France)

P1-10-20 The fundamental frequency of voice in candidates for cochlear implantation depending on their age
Elzbieta Wlodarczyk (Warsaw, Poland)

P1-10-21 Intonation of speakers with cochlear implant
Lisa Wälischmiller (Munich, Germany)

P1-10-22 Acoustic analysis of vowel production during the first year after cochlear implantation
Veronika Neumeyer (Munich, Germany)

P1-10-23 Speech perception in adult patients, users of Digisonic® SP cochlear implant with Saphyr processor
Leandra Silva (Bauru, Brazil)

P1-10-24 Analysis acoustic in children voice user cochlear implants
Maria Eugenia Prieto (Caba, Argentina)
**P2-7 ePOSTER SESSION**

17:00–18:00

**Cochlear implants in the elderly**

**Chair:** Ulrich Hoppe (Erlangen, Germany)
Thomas Keintzel (Wels, Austria)

**P2-7-1** Cochlear implantation in patients over 70 years of age
Naoko Nonami (Shinjuku-ku, Japan)

**P2-7-2** Audiological and speech perception results of cochlear implantation in deafened elderly
(over 65 years old)
Magdalena Lachowska (Warsaw, Poland)

**P2-7-3** Short and long term outcomes for elderly cochlear implant recipients
Ahmad Mahmoud (Philadelphia, United States)

**P2-7-4** The effects of age on sentence recognition testing among cochlear implant recipients:
AzBio vs. HINT
Ahmad Mahmoud (Philadelphia, United States)

**P2-7-5** Cochlea implantation in the elderly
Thomas Keintzel (Wels, Austria)

**P2-7-6** Old age, rather than reduced cognition, may worsen hearing post cochlear implantation
Jeremy Wales (Oxford, United Kingdom)

**P2-7-7** Cochlear implantation in elderly patients
Ferenc Tóth (Szeged, Hungary)

**P2-9 ePOSTER SESSION**

18:00–18:30

**Music therapy**

**Chair:** Valerie Looi (Sydney, Australia)
Anja Hahne (Dresden, Germany)

**P2-9-1** Results of an international questionnaire examining use of musical (re)habilitation for CI users
Julie Kosaner (Istanbul, Turkey)

**P2-9-2** Development of a music style identification test for cochlear implant and hearing aid users
Valerie Looi (Sydney, Australia)

**P2-9-3** Contribution of non-implanted ear to pitch perception for prelingually deafened cochlear implantees
Lieber Li (Taipei, Taiwan)

**P2-9-4** Evaluation of music perception using Fine Structure Processing (FSP) versus High Definition
Continuous Interleaved Sampling (HDCIS)
Ellen Pearce (Chapel Hill, United States)

**P2-9-5** Music perception and enjoyment in Brazilian cochlear implant users: a multicenter study
Lucas Costa (São Paulo, Brazil)
### P1-11 ePOSTER SESSION

**08:30–09:30**

**Auditory neuropathy**

**Chair:** Silke Kunze (Munich, Germany)
Jon Shallrop (Rochester, United States)

**P1-11-1** Etiological and rehabilitation dilemmas in late on set auditory neuropathy spectrum disorder
PK Sarafudeen (Perintalmanna, India)

**P1-11-2** Evaluation of the results of cochlear implant among prematures and fullterms with perinatal or postnatal hypoxia
Ahmed Mehanna (Alexandria, Egypt)

**P1-11-3** Assessment of speech perception and language in children with auditory neuropathy Spectrum Disorder users of cochlear implant
Elisabete Yamaguti (Bauru, Brazil)

**P1-11-4** Clinical picture of patients with auditory neuropathy
Susan Abdi (Tehran, Iran)

**P1-11-5** The auditory characteristics of children with narrow Inner Auditory Canal (IAC)
Yu Al (Ji Nan, China)

**P1-11-6** The influence of agc settings for speech recognition in eight cochlear implanted patients with auditory neuropathy
Anca Modan (Bucharest, Romania)

**P1-11-7** Our experience of pediatric cochlear implantation in auditory neuropathy spectrum disorder
Sevina Tzortzis (Birmingham, United Kingdom)

**P1-11-8** The pmn/pmn mouse, an animal model for auditory neuropathy?
Kristen Rak (Wuerzburg, Germany)

**P1-11-9** Relationship between patients with clinical auditory neuropathy spectrum disorder and mutations in GJB2 gene
Alexandre Guimaraes (Campinas, Brazil)

**P1-11-10** Cochlear implantation versus hearing amplification in patients with auditory neuropathy spectrum disorder
Marc Bennett (Nashville, United States)

### P2-10 ePOSTER SESSION

**08:30–10:30**

**Sound coding**

**Chair:** Reinhold Schatzer (Innsbruck, Austria)
Simone Volpert (Duesseldorf, Germany)

**P2-10-1** The prerequisites for language acquisition: how congenitally deaf children process vowel length after cochlear implantation – an EEG study
Anja Hahne (Dresden, Germany)

**P2-10-2** The effect of the stimulation rate on the newest fine structure speech coding strategies
Tobias Rottmann (Hanover, Germany)

**P2-10-3** Investigating the use of varying stimulation rates for different electrodes
Sonia Tabibi (Zurich, Switzerland)

**P2-10-4** Speech understanding and preference of cochlear implant recipients using FSP speech coding strategy (MED-EL) after conversion to FS4-LR and FS4-HR
Heinz Dieter Klünter (Cologne, Germany)

**P2-10-5** Time-domain pitch determination – the pitch picker
Michael Staudacher (Innsbruck, Austria)

**P2-10-6** Investigation of modeled potential distributions inside the electrically stimulated cochlea
Anja Chilian (Ilmenau, Germany)

**P2-10-7** Spectral contrast enhancement in CI coding strategies: a real-time implementation
Thilo Rode (Hanover, Germany)
Informational masking and stream segregation of psychophysical stimuli in bilateral cochlear implant users
Aswin Wijetillake (Melbourne, Australia)

Preferences of patients in the speech processor upgrades with new strategies
Paola Samuel (São Paulo, Brazil)

Time course of stream segregation in CI users
Martin Böckmann-Barthel (Magdeburg, Germany)

Gender identification and intelligibility of whispered speech in cochlear implant users: evaluation and analysis
Oldooz Hazrati (Richardson, United States)

Distribution of tryptophan hydroxylase immunoreactivity in the spiral ganglion neurons of mouse cochlea
Yuedi Tang (Chengdu, China)

Automated program selection – a better option by the speech-processor?
Simone Volpert (Duesseldorf, Germany)

Using channel-specific models to detect and mitigate reverberation in cochlear implant pulse trains
Jill Desmond (Durham, United States)

Study of temporal and place pitch percepts with single- and dual-electrode stimulation in the apex
Andreas Griessner (Innsbruck, Austria)

Performance of young children first fitted with the HiRes 120™ strategy: two years of follow-up
Nathalie Mathias (Staefa, Switzerland)

The effect of adaptive dynamic range optimization on speech intelligibility in adverse listening environments for cochlear implant users
Hussnain Ali (Richardson, United States)

Speech perception in children with cochlear implants with two sound processing strategy of the HiResolution system
Tatiana Melo (Bauru, Brazil)

An industry first: wind noise reduction for Nucleus® 6 cochlear implant recipients
Esti Nel (Sydney, Australia)

Evaluation of the battery lifetime improvement with the HiRes Optima™ strategy in Harmony™ cochlear implant users
Nathalie Mathias (Staefa, Switzerland)

Temporal coding of neuroprosthetics in the central auditory system: comparison of optogenetic, electrical and acoustic stimulation of the cochlear nucleus
Elliott Kozin (Boston, United States)

Auditory Brainstem Implants: indications and contraindications
Giuseppe De Donato (Piacenza, Italy)

Auditory and non auditory responses in ABI children
Artur Lorens (Kajetany/Warsaw, Poland)

Results after sequential bilateral auditory brainstem implantation
Artur Lorens (Kajetany/Warsaw, Poland)

Auditory Brainstem implant in four children with cochlear nerve aplasia
Norma Pallares (Buenos Aires, Argentina)
### P1-12: Case study – pediatric ABI fitting
*Katherine Wilson (London, United Kingdom)*

### P1-12: Routes towards closing the auditory implant feedback loop
*Theodor Doll (Hanover, Germany)*

### P1-12: Auditory brainstem implants in children: indication criteria and results
*Lutz Gärtner (Hanover, Germany)*

### P1-12: Optogenetically-driven auditory brainstem responses (oABR) in a model of an optical auditory brainstem implant
*Ariel Hight (Cambridge, United States)*

### P1-12: Speech perception with auditory brainstem implants in neurofibromatosis type II patients
*Stefan Brill (Wuerzburg, Germany)*

### P1-12: Audiological outcomes in a patient implanted with a cochlear and a brainstem implant
*Annelies Vermeiren (Wilrijk, Belgium)*

### P1-12: Hearing restoration in vestibular schwannoma caused deafness: report of two cases
*Mehmet Korkmaz (Ankara, Turkey)*

### P1-13: Bone conduction devices

#### Chair:
Myrthe Karianne Hol (Nijmegen, The Netherlands)
Martin Kompis (Bern, Switzerland)

#### P1-13: Modified skin incision in new Baha Atract implant
*Beldan Polat (Istanbul, Turkey)*

*Marc van Hoof (Maastricht, The Netherlands)*

#### P1-13: Imaging after Bonebridge implantation
*Christian Güldner (Marburg, Germany)*

#### P1-13: Localization skills in single side deafness patients with bone conduction hearing devices
*Henry Martinez (Bogota, Colombia)*

#### P1-13: A new transcutaneous transmission path for Baha® users: comparison with the test bands and the percutaneous abutments
*Martin Kompis (Bern, Switzerland)*

#### P1-13: Linear incision with no soft tissue reduction Baha insertion: preliminary results
*Monica Rodriguez-Valero (Manchester, United Kingdom)*

#### P1-13: Bone anchored hearing device implantation: the evolution of a surgery in a neurotology practice
*Harold Kim (Portland, United States)*

#### P1-13: Evaluation of the effectiveness and efficiency of the Cochlear Baha Attract system
*Anna Ratuszniak (Warsaw, Poland)*

#### P1-13: An active bone conduction implant in patients with single-sided deafness
*Rolf Salcher (Hanover, Germany)*

#### P1-13: Indication criteria and outcomes with the transcutaneous bone conduction implant Bonebridge
*Sasan Hamzavi (Vienna, Austria)*

#### P1-13: Speech comprehension in background noise in SSD patients using Baha after a vestibular schwannoma surgery
*Jiri Skrivan (Praha, Czech Republic)*

#### P1-13: Early experience with Baha Attract – active atranscutaneous solutions
*Jaydip Ray (Sheffield, United Kingdom)*
P1-13-13  Placement considerations for the MED-EL Bonebridge  
David Morris (Halifax, Canada)

P1-13-14  Acoustic and wireless hearing in bone-anchored hearing  
Arjan Bosman (Nijmegen, The Netherlands)

P1-13-15  Fitting of the MED-EL Bonebridge system  
Anna Ratuszniak (Warsaw, Poland)

P1-13-16  Bone-anchored hearing implant loading at three weeks: stability, survival and tolerability after three years  
Christine den Besten (Nijmegen, The Netherlands)

P1-13-17  Improving speech in noise hearing performance of users of a bone conduction hearing system using a wireless remote microphone  
Mark Flynn (Gothenburg, Sweden)

P1-13-18  A national registry for bone anchored hearing implants  
Sue Archbold (Nottingham, United Kingdom)

P1-13-19  Evaluation of the MED-EL Bonebridge in single-sided deafness using a multisource noise field  
Clemens Honeder (Vienna, Austria)

P1-13-20  Baha attract versus Baha Dermalock system: multicenter comparative clinical study  
Mete Iseri (Kocaeli, Turkey)

P1-13-21  A minimally invasive technique for the implantation of Baha attract system  
Mete Iseri (Kocaeli, Turkey)

P1-13-22  Baseline of effectiveness, quality of life and soft tissue complications with Baha  
Yiannakis Kyamides (Nicosia, Cyprus)

P1-13-23  Initial results with the bone bridge active bone conduction device  
Roberta Marino (Fremantle, Australia)

P1-13-24  Bonebridge – performance and localisation results with a new bone conduction implant  
Timo Stöver (Frankfurt/Main, Germany)

David Morris (Halifax, Canada)

P1-13-26  Bone anchored hearing implants installed with soft tissue preservation techniques – a systematic literature review  
Marcus Holmberg (Askim, Sweden)

P1-13-27  A wide bone anchored hearing implant: six months data from a prospective multicenter study  
Anirvan Banerjee (Middlesbrough, United Kingdom)

P1-13-28  Clinical evaluation of results of using new Baha® abutment covered by hydroxyapatite and new surgical technique without soft tissue reduction  
Wojciech Gawecki (Poznań, Poland)

P1-13-29  Transcutaneous bone conduction implant (Bonebridge™) – first results in speech perception and directional hearing  
Lars-Uwe Scholtz (Bielefeld, Germany)

P1-13-30  Sound localization in patients supplied with the Bonebridge  
Viktor Koci (Innsbruck, Austria)

P1-13-31  Safety and performance of the Bonebridge™ Bone Conduction Implant System in children and adolescents  
Gabriella Bock (Innsbruck, Austria)

P1-13-32  Effectiveness and Impact on quality of life of Baha in Russian speaking patients  
Neylya Mileshina (Moscow, Russia)
P1-13-33 Long term-safety and effectiveness of the Bonebridge™ Bone Conduction Implant System in adults
Robert Wiek (Innsbruck, Austria)

P1-13-34 Safety and performance of the Bonebridge™ Bone Conduction Implant System in children and adolescents
Gabriella Bock (Innsbruck, Austria)

P1-13-35 Sound localization with a bone conduction hearing implant in patients with a unilateral air-bone gap: analogue vs. digital sound processors
Jolien Desmet (Edegem, Belgium)

P1-13-36 Preoperative headband assessment for the MED-EL Bonebridge in conductive hearing loss: is it helpful or misleading?
David Morris (Halifax, Canada)

P1-13-37 Baha in various acquired and congenital ear malformations in children
Maciej Mrowka (Warsaw, Poland)

P2-11-1 Correlation of vestibular testing with subjective symptoms before and after cochlea implantation
Arianne Monge Naldi (Zurich, Switzerland)

P2-11-2 Electrophysiologic detection of scalar changing cochlea electrode arrays – a blinded study
Philipp Mittmann (Berlin, Germany)

P2-11-3 Late sequelae of recurrent acute otitis media in children after cochlear implantation
Noam Yehudai (Haifa, Israel)

P2-11-4 Biofilm detection on cochlear implants
Natalie Kanaan (Hanover, Germany)

P2-11-5 Effect of dexamethasone to reduce post-auricular swelling in the first day after cochlear implant
Saleh Alamry (Riyadh, Saudi Arabia)

P2-11-6 Vacuum delivery – needs extra consideration before potentially cochlear implantation?
Saba Battelino (Ljubljana, Slovenia)

P2-11-7 Baha surgery and complications depending on different strategies of surgery
Joergen Kohl (Halberstadt, Germany)

P2-11-8 Pain in cochlear implant recipients – an uncommon, yet serious consequence of cochlear implantation
Yisgav Shapira (Tel Hashomer, Israel)

P2-11-9 Cochlear implantation surgery – what are the risk factors for postoperative complications?
Natalie Kanaan (Hanover, Germany)

P2-11-10 Approaches for the treatment of the cochlear implant users with long-term suppurative perifocal complications
Vigen Bakshshyan (Moscow, Russia)

P2-11-11 Complications in cochlear implantation
Franco Trabalzini (Siena, Italy)

P2-11-12 Normalization of balance by vibrotactile neurofeedback therapy in cochlear implant patients with postoperative vertigo
Dietmar Basta (Berlin, Germany)

P2-11-13 Electrode migration in cochlear implant recipients
Kerstin Willenborg (Hanover, Germany)
P2-11-14  Surgical and medical management for complications in 700 consecutive cochlear implantations  
E. C. Vinaya Kumar (Hyderabad, India)

P2-11-15  Cochlear implant complications in Costa Rica: 11 years experience  
Eladio Valverde Villalobos (San José, Costa Rica)

P2-11-16  Cochlear implants’ complications  
Maciej Mrowka (Warsaw, Poland)

P2-11-17  Skin flap complications after cochlear implantation  
Wojciech Gawęcki (Poznani, Poland)

P2-11-18  Case report: an accidental fall that could have required an MRI in the early stages after cochlear implantation surgery  
Minoru Hara (Nagasaki, Japan)

P2-11-19  Dura mater perforation caused by electrode migration – 14 years after cochlear implantation  
Eva Fischer-Krall (Cologne, Germany)

P2-11-20  A new method to prevent magnet migration  
Ellana Cristofari (Varese, Italy)

P2-11-21  Perioperative fever in children following cochlear implants surgery  
Sabi El-Saied (Beer Sheva, Israel)

P2-11-22  Evaluation effect of retained stylet in rehabilitation: a case report  
Thanarat Imsuwansri (Nonthaburi, Thailand)

P2-11-23  Cochlear implants, complications in Oman  
Ammar Al Lawati (Hamria, Oman)

P2-11-24  Postoperative complications of cochlear implantation surgery: experience in Beni Messous Hospital, Algiers  
Amina Mouzali (Algiers, Algeria)

P2-11-25  Cochlear Implant surgery without shaving: our experience  
Fida Al-Muhawas (Riyadh, Saudi Arabia)

P2-11-26  The risk of “silent” labyrinthitis in patients after cochlear implantation  
Julia Gekeler (Cologne, Germany)

P2-11-27  Pain with failure of cochlear implant device: a 5-patient pediatric experience  
N. Wendell Todd (Atlanta, United States)

P2-11-28  Electrode array misplacement into the superior semicircular canal: as a rare complication of cochlear implantation  
Jing Sun (Hefei, China)

P2-11-29  Reparation of external auditory canal with osteostimulation after secondary cholesteatoma in one patient with cochlear implant  
Miguel Caballero (Barcelona, Spain)

P2-11-31  Vestibular aspects in cochlear implant procedure  
Piotr Skarzynski (Warsaw, Poland)

P2-11-32  Speech discrimination following re-implantation of cochlear implants  
Jayesh Doshi (Manchester, United Kingdom)

P2-11-33  A model to evaluate explant force and trauma of intracochlear electrodes post chronic implantation  
Frank Risi (Sydney, Australia)

P2-11-34  Revision cochlear implant surgery in adults and children  
Alessandra Murri (Piacenza, Italy)

P2-11-35  Indonesian experiences in cochlear implant revision surgeries  
Soekirman Soekin (Jakarta, Indonesia)

P2-11-36  Hearing thresholds assessment of patients following 10 years of cochlear reimplant surgery  
Lucas Costa (São Paulo, Brazil)
P2-11-37  Hearing performance after two re-implant: a case study  
Lucas Costa (São Paulo, Brazil)

P2-11-38  A case report: a little girl with advanced Bionics cochlear implant, surgically treated twice for  
skin flap necrosis, and subsequently explanted and then re-implanted with MED-EL cochlear  
implant. Management and results  
Antonio Della Volpe (Naples, Italy)

P2-12  ePOSTER SESSION  
12:00–13:00  
ePoster 2

Quality of life and economics

Chair:  
Sofia Aidona (Thessaloniki, Greece)  
Thomas Braun (Munich, Germany)

P2-12-1  Promotion in the media of the cochlear implantation (technology/surgery/rehabilitation/  
outcomes) to sensitize the public and decision/policy makers  
Marian Stamate (Bucharest, Romania)

P2-12-2  Implications for clinical cost effectiveness using new intraoperative measuring technology  
George Tavartkiladze (Moscow, Russia)

P2-12-3  Sufficient organization of a cochlear implant team with rising patient numbers as a constant  
challenge – a problem-solving approach from Halberstadt  
Uta Uholz (Halberstadt, Germany)

P2-12-4  Speech perception and communication adaptation in patients with cochlear implants  
Hui-Ping Lu (Tainan, Taiwan)

P2-12-5  Cochlear implantation in prelingually deaf children: effect on quality of life  
and speech perception  
Sofia Aidona (Thessaloniki, Greece)

P2-12-6  Influence of psychological aspects on quality of life of pre and post-lingual  
cochlear implant users  
Carlos Campos (São Paulo, Brazil)

P2-12-7  Novel communication systems for the deaf people in a major disaster  
Takao Yabe (Tokyo, Japan)

P2-12-8  Children using hearing implants – quality of life, validation and initial results  
Georgina Sanderson (Sydney, Australia)

P2-12-9  Reliability of MED-EL cochlear implants in Romania  
Mariona Poenaru (Timisoara, Romania)

P2-12-10  Satisfaction evaluation between Digisonic SP monaural and binaural  
Fernando Fernandes (Campinas, Brazil)

P2-12-11  Comfort and satisfaction with the nucleus CP810 cochlear implant processor  
Alicia Huarte (Pamplona, Spain)

P2-12-12  CI in an adult active population  
Alicia Huarte (Pamplona, Spain)

P2-12-13  Evaluation of benefit from cochlear implantation in patients over 60 years old in terms  
of quality of life, speech comprehension, spatial hearing and speech quality  
Marek Zadrozaik (Lublin, Poland)

P2-12-14  Cochlear implantation in Macedonia  
Makedonka Garvanlieva Nikolova (Skopje, Macedonia)

P2-12-15  Historical role of a leading cochlear implant center in Brazil  
Sonia Mesquita (Bauru, Brazil)

P2-12-16  Hearing and life quality assessment in post-language patients following cochlear implant  
Giselle Truzzi (Campinas, Brazil)

P2-12-17  Changes in quality of life in prelingually and perilingually deaf adults following  
cochlear implantation  
Miryam Calvino (Madrid, Spain)
P2-12-18 Cochlear Implantation in a patient with a long history of dual sensory deprivation of deafness and blindness secondary to Nasopharyngeal Carcinoma: a case report
Sara AlMulhem (Riyadh, Saudi Arabia)

P2-12-19 The impact of overlooked cerumen and or otitis media on the hearing threshold shift, and hearing acuity of speech in children with bilateral sensorineural hearing loss, a public health care problem
Naeimeh Daneshmandan (Tehran, Iran)

P2-12-20 Hearing quality in cochlear implant users over 65 years
Susana Mauricio (Mendoza, Argentina)

P2-12-21 Classroom participation and academic competence of cochlear implanted junior high school students in Japan
Yusuke Saito (Tokyo, Japan)

P2-12-22 Relation between outcome and quality of life in elderly patients with unilateral cochlear implant
Juan Chiossone-Kerdel (Caracas, Venezuela)

P2-12-23 Tîrgu Mureș, the youngest cochlear implant center in Romania
Gabriel Lostun (Tîrgu Mureș, Romania)

P2-12-24 Change in attitude to cochlear implants in born deaf adults
Tracy Wright (Birmingham, United Kingdom)

P2-12-25 High charge electrical stimulation is associated with hearing loss after hearing preservation cochlear implantation
J. Bertroche (Iowa City, United States)
**Media Check**

The media check is located on the mezzanine floor (between ground floor and first floor) next to the registration counter. The media check and all meeting rooms will be equipped with Microsoft Windows based PCs. For smooth operation of sessions speakers are requested not to bring their presentation directly to meeting rooms. All presentations and additional media files have to be delivered to the media check before the corresponding session starts. Speakers are requested to hand in their presentations at least 2 hours before their talk. Speakers having a presentation during the first time slot in the morning are asked to hand in their slides the day before. Technicians will assist with the upload of files and provide the opportunity to preview and/or edit the presentation if necessary. Should speakers be unavoidably delayed, they must still go directly to the media check. Speakers shall not bring a laptop or other media device to the session room.

**Opening Hours**

<table>
<thead>
<tr>

<th>June 19, 2014</th>
<th>June 20, 2014</th>
<th>June 21, 2014</th>
</tr>
</thead>
<tbody>
<tr>
<td>Opening</td>
<td>12:00–18:30</td>
<td>07:00–18:00</td>
<td>07:00–18:00</td>
<td>07:00–14:00</td>
</tr>
</tbody>
</table>

**Technical Requirements**

Verification of proper performance in the media check is essential, particularly if video and/or animation are included in the presentation. Please note that internet access will not be available during the presentation. When reviewing the presentation in the media check, make sure all fonts, images, and animations appear as expected and all audio or video clips are working properly.

The following presentation file types will be supported:

- **Microsoft Office**: PowerPoint, Word, Excel (.ppt, .pptx, .doc, .docx, .xls, .xlsx)
- **Adobe Acrobat** (.pdf)
- **Media Files** (.wmv, .mpg, .avi, .swf, .wav, .mov, .mp3)

**Oral Presentations**

Computer projection facilities (PowerPoint presentations) will be available in all meeting rooms. Presenters are advised to finalize their presentations well in advance. Presentation time is 5 min, followed by 3 min for questions/discussion. Please make sure the presentation does not take longer. Chairpersons are advised to strictly follow the schedule and interrupt if necessary.

**ePoster Presentations**

If you are interested in a specific ePoster and if the author allows the distribution of a PDF-version, you can enter your email address on the iPad. The poster will be sent to you via email which allows you to get in contact with the author of the poster aside from the ePoster- and snapshot presentations.

**Video Presentations**

Please note that video presentations are scheduled for 15 min (12 min videos and 3 min discussion). We strongly advise to adhere to the time limit. On-site videos will be presented on interactive ePoster terminals. Videos are available throughout the poster terminals without the speakers’ attendance during the whole conference. Videos will also be available for download on the website after the conference, if the authors agree.

**Snap Shot Presentations**

Key results and message will be presented in a short oral presentation (4 min). Additionally authors will prepare an ePoster presenting background information, details about the study design, methodology as well as results. ePoster presentations will also be available for download on the website after the conference, if the authors agree.

All accepted abstracts will be published online and remain permanently accessible as a fully citable source at Open Access LMU, the platform for publications at LMU Munich University Library.
GENERAL CONFERENCE INFORMATION

Language
The official language of the conference will be English. Simultaneous translation will not be provided.

Conference Venue
Gasteig München GmbH
Rosenheimer Str. 5
81667 Munich, Germany

Registration
Registration on-site is possible at the registration desk situated on the mezzanine floor (between ground floor and first floor). However, waiting can be eased, if participants register online in advance. Pre-registered participants will receive a barcode which is required on-site in order to print the badge. Therefore, it is essential to have the barcode ready. Self-printing stations are located directly in front of the registration desk.

Phone: +49 (0)89 480 98 97150 and +49 (0)89 80 98 97160

Opening Hours
Wednesday June 18, 2014 12:00–18:30
Thursday June 19, 2014 07:00–18:00
Friday June 20, 2014 07:00–18:00
Saturday June 21, 2014 07:00–16:30

Methods of Payment at the Registration Desk
On-site you will be able to pay by cash, debit order (for German participants only) or credit card (Visa, MasterCard, American Express).

Conference Documents
Registration fee for participants covers: admission to scientific sessions and satellite symposia, poster exhibition, industry exhibition, final program, collection of abstracts, conference bag, certificate of attendance, opening ceremony and welcome reception. Registration fee for accompanying persons covers: Opening ceremony, admission to poster and industry exhibition.

Name Badge
The name badge will be the official ticket and should be worn at all times in order to access meeting rooms and exhibition halls. In case of lost or forgotten badges an administration fee of € 20 will be charged.

Cloakroom
The cloakroom is situated on the lower mezzanine level.

Opening Hours
Wednesday June 18, 2014 12:00–21:30
Thursday June 19, 2014 07:00–19:00
Friday June 20, 2014 07:00–19:00
Saturday June 21, 2014 07:00–18:30

Gastronomy
The catering stations for the coffee and lunch breaks are located in the exhibition halls (Foyer, Glas Hall). Participants will be offered snacks and beverages. These meals are included in the registration fee. During the breaks, various kinds of drinks will be offered in front of the Carl-Orff-Saal.

Internet Access
Free WIFI will be available in the conference venue. Login details will be provided onsite.

Conference App sponsored by MED-EL
Download the conference program to your mobile device (iPhone, Android). You will be able to view the day-by-day program, select sessions and create your own agenda. Just download the App www.medel.com/ci2014 from the App Store.

Abstract USB Stick sponsored by Arri
Abstracts will be published on USB stick. You will find a voucher in your conference bag to pick up your personal copy at booth 04. Companies and participants may copy material for their personal use. Further copies for sale or for any other commercial purpose is prohibited without prior permission of the editor.

GENERAL CONFERENCE INFORMATION

CME Accreditation
The conference has been accredited by the national authority “Landesärztekammer Bayern” (LAEK Bavaria). You are kindly asked to register once a day at the accreditation counter at the registration desk in the entrance hall.

Opening Hours
Thursday June 19, 2014 07:00–18:00
Friday June 20, 2014 07:00–18:00
Saturday June 21, 2014 07:00–12:00

Please bring enough EFN stickers for the accreditation lists (one sticker per day). You will receive a certificate with your credit points after the conference. All credits achieved by participants will be directly reported by the conference organizers to the “Landesärztekammer Bayern”.

Certificate of Attendance
All registered participants will receive a certificate of attendance with their conference documents.

Photography, Audio, Video and Mobile Phone Policy
Audio, photo and video recording by any device (e.g. cameras, laptops, PDAs, mobile phones, watches) is strictly prohibited during all oral and poster sessions, unless prior permission is obtained from the conference organizer. Use of mobile phones is strictly prohibited during scientific sessions. Mobile phones must be switched off while attending sessions.

Exhibition
Please join the industrial exhibition taking place in Foyer, Glass Hall. For further information please see the list of exhibitors and the floor plan.

Smoking
Smoking is strictly prohibited in the conference venue by law.

Prayer Areas
There are two areas set apart for prayer. They are quiet places where delegates may withdraw to seek divine strength and guidance. The prayer areas are located on the 3rd floor in front of the entrances R and M of Philharmonie. Signs will be displayed to facilitate directions.

Induction Loop for the Hard of Hearing
There are induction loops in the Carl-Orff-Saal, Black Box, Kleiner Konzertsaal and Vortragssaal der Bibliothek. Please get a map with suitable seats for hearing impaired people from the registration desk. There is no loop in the Chorprobensaal and the Philharmonie.

Program Changes
The organizer reserves the right to make changes if necessary. No full or partial refunds are made to the attendees in the event of cancellations or other changes in the program. Please note that changes will be posted at the registration desk and at the entrance of the session halls. Participants will be informed about the changes.
